

We're looking for families with autistic toddlers to participate in our **SMART communication and behavior** study

Eligibility

Age

Child is between
18 and 48
months old

Autism

Child has an
autism diagnosis

Language

Child hears English
for at least
half their day

Availability

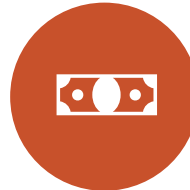

Caregiver willing to
participate in 1-2
sessions per week

Incentives

Money

Up to \$200
for your family's time
over the 6-month study

Online

Activities occur over
video calls during a time
that is convenient for you

Development

Learn how to support
your child's
communication and
behavior

iPad

Receive an iPad (and
potentially cellular
service) during your
participation

About

Our mission is to support and enhance early development of infants and toddlers. We strive to empower families to implement effective early intervention strategies, to increase implementation of evidence-based and family-centered practices in early intervention, and to understand the best ways to adapt and customize intervention strategies based on child and family characteristics.
