

Dog Park Upgrades

This past spring, irrigation was installed in the large dog area. We purchased and installed new sail shades to replace worn ones in the small dog area.

We're excited to announce several other enhancements scheduled for fall, thanks to a generous donor and our dedicated team.

- **Bollards:** New bollards (the orange posts) are ordered to replace the broken ones in front of the handicapped parking spaces at the south entry.
- **Pavers:** Are ordered and scheduled for installation under the sail shades in the small dog area.
- **Bench:** A new bench will be installed in the small dog area.
- **Quiet Area:** Pavers will be installed under the existing bench, and a water station will be added.
- **Landscape Management:** Jimmy's Tree Service has windowed the mangroves along the river. Perez Tree Service will trim the trees within the park.
- **Fences:** Inspection and repairs are scheduled for all fence lines.
- **Pavilions:** Sanding and repainting will take place where rust has formed.

In the plans:

- **Handicapped Parking:** Two more handicapped spaces are planned for both south and east side parking areas.

As our seasonal visitors return, please welcome them back and help any newcomers become acquainted with the park rules and our dog park community.
