FOUNDATION, INC.

Scholar Spotlight

Joreliz Colón **Chester Upland Chapter**

Joreliz Colón attends Chester STEM Academy where she is in the 9th grade. This has been her first Program Year with YMWIC. Not only has she enjoyed the Foundation's offerings, she has gained a new appreciation for science by being involved in engaging hands-on experiments and other exciting activities during workshops and the Science Expo. Joreliz's message for potential or younger YMWIC Scholars is, "Being a member is fun and can help you very much. It offers so many unique opportunities that can help you with your college journey."

Joreliz would like to study nursing or become a detective and is considering attending New York University. She enjoys playing softball, spending time talking with her friends, and playing games.

We are pleased you enjoyed your first year with YMWIC, Joreliz, and look forward to serving you next Program Year!
