

## Scholar Spotlight

### **Vicente Montes Ocampo Coatesville Chapter**

Vicente Montes Ocampo, a member of our Coatesville Chapter, attends Coatesville Area Senior High School, where he is in the 11<sup>th</sup> grade. This has been his second program year with YMWIC, saying that it is a great program that provided many opportunities to work and learn. He encourages younger Scholars or those who are considering YMWIC to get involved in as many things as possible and learn how to network with people.

He has most enjoyed robotics and the annual Botball Robotics Tournament, in which he has competed as a member of the YMWIC Varsity Robotics Team. When asked what the biggest impact the Foundation has had, Vicente says, “The biggest impact it made on me was it taught me how to manage my time and how to use it wisely.”

Vicente would like to attend Stevens Institute of Technology and study to become a Mechanical Engineer. He is proud of the computer science award he received from the Lincoln University computer science summer camp. In his spare time, he loves to spend time with his family and play volleyball or soccer.
