Saint Vincent College Tour

On September 28, 2023, a group of twenty-one 11th and 12th grade YMWIC Scholars boarded a bus, accompanied by three chaperones, and headed to Saint Vincent College in Latrobe, Pennsylvania, for a college tour and learning experience. This trip is the first in a series of three for YMWIC juniors and seniors to visit local colleges. We will visit Villanova University in December and Lincoln University in February, 2024. Scholars stayed overnight at the Marriott Hotel and participated in an exciting, activity-filled campus tour on Friday.

During the tour of campus buildings, Scholars visited and had short Q&A sessions with members of the Admissions Department, faculty of the School of Business, Education, Herbert W. Boyer School of Natural Sciences, Mathematics, and Computing Departments, and Athletic Department where they met coaching staff. Several engaging learning activities were planned during the tour allowing Scholars to enhance their engineering problem-solving skills by building cell phone holders. Scholars also enjoyed a hands-on Anatomy Lab demonstration at Saint Vincent's state-of-the-art 3-D Anatomy Visualization Anatomage Table, an Entomology (the study of insects) Science Lab activity, and actively participated in a panel discussion that answered Scholars' questions about life as a student or faculty at the college. Our Scholars had an amazing experience at Saint Vincent College and gained so much from the various learning activities planned throughout their stay! We are proud of our YMWIC Scholars that graduated from Saint Vincent College and pursuing successful professional careers. We wonder which Scholars will apply, be accepted, and continue the Saint Vincent College "Streak of Success?"
