# Scholar of the Month: Coatesville Chapter Tanner Wallace

Tanner is a dedicated 10th grade Scholar from Collegium Charter School who joined YMWIC in 8th grade and has continued to grow through the Program. He says, "What I love most about YMWIC is the teamwork, especially working alongside people I trust; and, of course, the delicious food and snacks provided during workshops.

Since joining YMWIC, Tanner has seen improvements in his teamwork skills and has become more confident collaborating with others. He continuously pushes forward in his academic and personal life with determination. His perseverance is also reflected outside the classroom. He recently tested for his black belt in karate, an accomplishment that demonstrates discipline, focus, and commitment.

After graduating high school, he hopes to become a programmer and is interested in building a future in technology. In his free time, he enjoys gaming and learning through playing different types of online games.

When asked what advice he would give younger or new scholars, Tanner shared, "Work hard for better results." He also encourages others to learn more about YMWIC because of the opportunities it provides through the Science Expo, college preparation, and tuition assistance.

We are proud to recognize this scholar for his growth, resilience, and dedication, and we look forward to seeing all he accomplishes in the future.
