Scholar Spotlight

Heidi Potts Coatesville Chapter

Meet Heidi Potts, one of YMWIC's standout Scholars! This fall, Heidi will be a 10th grade student at Collegium High School, where she is already gearing up for an exciting year filled with new academic and extracurricular experiences. Among her favorite subjects is Pre-Calculus, a challenging course that complements her interest in STEM fields.

Heidi is not only focused on academics but is also active in extracurriculars. She plans to play lacrosse for Collegium and is eager to join various clubs which include the Robotics Club, Aerospace Club, UNICEF, Chemical Club, and Art Club. These activities support her aspirations of pursuing a career in Biomedical Engineering—a field where her love for creativity and science can flourish.

When asked about college, Heidi is considering Drexel University, one of the institutions she is particularly interested in after learning about its innovative programs. In her free time, Heidi enjoys expressing herself through drawing and art, a passion that allows her to relax and explore her creative side.

Looking ahead to the new school year, Heidi is most excited about the expanded academic opportunities and experiences both inside and outside the classroom. She admires her mom, who has been a significant source of inspiration and support in her life. If Heidi could ask her future 18-year-old self one question, it would be, "Do you have any regrets?" She hopes this question will encourage her to make the most of every moment as she navigates her high school years.

Heidi's commitment to her education and her enthusiasm for learning make her an exceptional Scholar within the YMWIC Foundation. We look forward to watching her continue to grow and achieve her goals!
