Pre-Apprenticeship Program

Wrapping Up the YMWIC Pre-Apprenticeship Program Inaugural Year

The inaugural year of the YMWIC Pre-Apprenticeship Program has been a success! As we close out this first Program Year, we are grateful to all who have helped to make it a success. We had a good number of Partners who collaborated with us for our first year and are looking to double that number next year.

We are in the final phases of applying to become a Pennsylvania-certified Pre-Apprenticeship Program, which

will help us to expand our reach and serve even more qualifying individuals. If you are a high school graduate and/or hold a GED, are 18-24 years old, and are seeking a hands-on pathway to employment in the trades or a non-degree area without pursuing a four-year college path, you are welcome to apply for our Program. As a member, you will receive exposure to and experiences in Engineering Technology, Manufacturing, Construction and Architectural Engineering, Information Technology and Cyber Security, and Utilities. Participants are not required to be YMWIC Alumni.

You can complete an application for the YMWIC 2025-2026 Pre-Apprenticeship Program by [clicking here](#).
