Scholar Spotlight

August Kollar Phoenixville Chapter

August Kollar, is our featured Scholar for the Phoenixville Chapter this month. August, who is in the 7th grade at Phoenixville Area Middle School, joined YMWIC when he was in the 3rd grade. When asked what he likes most about being a member, August said, “I love the workshops; they give me more opportunities to get exposure to science. I think that YMWIC will help me learn more than I might learn in class at school.” He added, “I really learn so much each time I do a project for the Science Expo. I think that learning the Scientific Method will help me be a better scientist and science student.” August also enjoys the Community Service events he has the opportunity to participate in with YMWIC.

Some of August’s accomplishments during his last school year are that he was an Honor Roll student and sang in a vocal competition that took place in Hershey Park, Pennsylvania. His vocal ensemble placed for their performance. In the future, August would like to be a physician, possibly an anesthesiologist, and work on difficult medical cases; he is considering Oxford University.

Outside of his studies, he swims with the Upper Merion Marlins, plays percussion in two of his school’s bands, sings in the Choir and Select Vocal Ensemble, and participates in service projects with his youth group at church. You are quite impressive, August; keep up your great work!
