Scholar Spotlight

Alonzo Taylor **Chester Upland Chapter**

Alonzo Taylor is enjoying his second Program Year as a YMWIC Scholar. Alonzo is an 11th grade student at STEM Academy at Showalter where he is proud to have been an Honor Roll student. Two of the main reasons he joined the Foundation is to gain exposure to a variety of colleges and increase his chances of getting accepted into the one of his choice. He is working hard at fulfilling his obligations as a YMWIC Scholar and earning a college scholarship. He is excited about the support provided by the Foundation in preparing him to navigate the college application and financing processes.

Alonzo also appreciates YMWIC's emphasis on STEM; he would like to focus on Technology, possibly Information Technology, Game Developing and would like to attend Yale University. He also has an interest in being a Social Media Influencer or a singer. Outside of studies, Alonzo has many interests including cooking, cleaning, playing video games, and reading interesting books.

Continue working hard, Alonzo; we are confident you will accomplish all of your goals.
