Scholar Spotlight

Santigie Thollie **William Penn Chapter**

Meet William Penn Scholar Santigie Thollie. He is completing the 10th grade at Penn Wood High School as an Honor Roll student. Santigie joined YMWIC this Program Year and has most enjoyed the people he has met and the Program activities. We asked Santigie what he finds to be the biggest impact of membership in YMWIC

has had on him. His reply, “It’s helped me with time management and also exposed me to things I need now and in the future.”

In the future, Santigie would like to become an Electrical Engineer and is considering Cheyney University, West Chester University, Penn State University, or a trade school to continue his education. He is involved in many activities including playing the trumpet, playing baseball, and wrestling. In his free time, he enjoys playing video games, caring for his cats, and making friends.

Welcome, Santigie, continue working hard and taking advantage of all YMWIC has to offer as you prepare for college.
