Scholar Spotlight

Peyton Jackson **Norristown Eisenhower Chapter**

Peyton Jackson is in the 8th grade at Pennbrook Middle School where, he is proud to say, he earned Distinguished Honor Roll status during the first marking period and Honor Roll for the second and third. He was also invited to participate in the Bux-Mont Honors Chorus.

Peyton found this, his first Program Year as a YMWIC member, to be a great experience, saying, “What I enjoy most about the Foundation are the hands-on projects. My favorite project so far was building a robot. I was able to make the robot move its arms up and down and make its eyes change colors using sensors.” He adds, “The biggest impact the Foundation has made on me is having the opportunity to present my Science Project at the Annual Science Expo. This is the first time I have ever had to present a Science Project in front of judges.”

Peyton says he is interested in health careers; he would like to become a neurosurgeon or an obstetrician, and is considering Duke University, Howard University, Lincoln University and Morehouse College. A well-rounded young man, Peyton likes to sing and is a member of the Chorus and Vocal Ensemble at school. He also enjoys theater, and has taken part in several musical productions. He has also participated in throwing events in track and field. In his free time, Peyton likes to watch programs such as Blackish and Abbott Elementary and enjoys playing video games and drawing characters.

The pleasure is all ours, Peyton; we are honored you are a YMWIC Scholar. A point of interest--tuition is covered for graduate-level coursework, a factor you may want to consider if you are a Lincoln University graduate.
