## Widener University College Tour

### Widener University College Tour Impresses Scholars

On January 17th, seven YMWC Scholars had the opportunity to tour Widener University in Chester, PA. They first visited with an Admissions representative and two current students who provided valuable insights into the admissions process, campus life and academic programs, while engaging Scholars in a lively Q&A Session. The visit included an in-depth exploration of the campus that included a tour of the science labs where students learned about the University's cutting-edge research and academic offerings. From the Chemistry Lab to the Robotics Lab, Scholars had a chance to test some of the equipment.

They also had a rare opportunity to experience campus living with a peek inside a dormitory and enjoyed a delicious meal in the University's dining hall. To round out their visit, they stopped by the bookstore to purchase Widener paraphernalia as keepsakes of their memorable day.

The visit proved especially exciting as several Scholars have already applied to Widener and are eagerly awaiting admission decisions. This experience not only provided a glimpse into college life, but it also inspired and motivated the Scholars to pursue higher education.
