Scholar Spotlight

Anthony Stokes **Chester Upland Chapter**

This month, we're excited to feature Anthony Stokes, a 10th-grade Scholar at Chester STEM Academy. Anthony joined YMWIC this year and has already embraced the opportunities and experiences the Foundation offers.

Anthony enjoys the variety of activities he participates in at YMWIC, from engaging projects to meeting new people and receiving academic support. He credits YMWIC with motivating him to study more and inspiring his newfound goal of attending college. In fact, he now has his sights set on Texas as a potential college choice, with a future career as a lawyer in mind.

To younger Scholars and new members, Anthony advises staying on task and making the most of the experience. For those unfamiliar with YMWIC, he describes it as a program where Scholars can engage in exciting experiments and receive guidance on their journey to college.

Anthony's dedication to his studies has already earned him recognition, as he's received both Honor Roll and Student of the Month awards. Outside of academics, he enjoys spending time outdoors, reading, and watching TV.

Anthony's journey with YMWIC has only just begun, and we look forward to supporting him as he grows, learns, and works toward his goals as a Scholar.
