Scholar Spotlight

Michelline Kho Furness Chapter

Meet Michelline Kho, an 8th grade Scholar from Furness High School in the Philadelphia School District who is preparing for an exciting new chapter as she enters high school next year! Michelline's favorite subject is Math, though she humorously points out she loves the more challenging math problems. A lover of badminton, she also finds passion in mural arts and attending church.

At this point, Michelline is setting her sights on becoming either an Engineer or a Medical Doctor. While she doesn't have a favorite college just yet, she's already thinking ahead about her future. When she's not working hard in school, you can probably find her catching up on sleep—her favorite free-time activity.

When it comes to YMWIC, Michelline would love to see more field trips, and she thinks adding water parks to the Program would be a fun twist. As for her role model, she admires Jesus the most. If she could ask her 18-year-old self anything, she'd want to know, "How did we pass school so far?"—a question that shows both her curiosity and sense of humor.

Keep an eye on Michelline as she continues her academic journey and strives for great things!
