## Scholar Spotlight

### **Kesmyn Mugo** **William Penn Chapter**

Kesmyn Mugo is an impressive first-year YMWIC Scholar. He is a tenth grade Distinguished Honor Roll student at William Penn High School. He dived right into being a Scholar, attending workshops, community service events, and joined the Robotics Special Interest Group (SIG). He says it has been fun to learn about all the ways robotics can be used and building them is his favorite part.

Kesmyn is interested in attending MIT (Massachusetts Institute of Technology), Carnegie Mellon University, University of Pennsylvania, or California Institute of Technology. He would like to be a Robotics or Mechanical Engineer.

When talking to younger Scholars or those who don't know about YMWIC, Kesmyn explains, "The Foundation staff, resources, and opportunities help you be a better you." Scholars should ask lots of questions and be sure to keep their grades up.

In his free time, Kesmyn volunteers in his community, hangs out with his friends, builds LEGO models, plays video games and works on his Beyblade YouTube channel.

Kesmyn says that YMWIC has made a huge impact on helping him to believe in himself.

Kesmyn, we are excited to witness your growth as a YMWIC Scholar!
