FOUNDATION, INC.

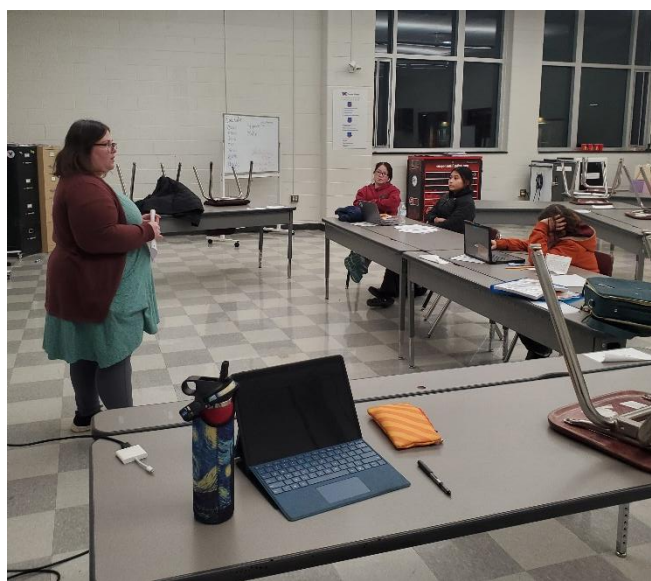

Workshop Summary

Workshop 11

For Workshop 11, STEM Educators and Project Coordinators gave the Scholars some tips and tricks on public speaking for their Science Expo presentations. Scholars learned about the importance of speaking clearly and confidently while giving their presentations. To prepare for presenting their Science Projects, some Scholars chose to make note cards to help them remember what to say and always face the audience. Scholars then had the opportunity to do a dry run of their presentations and receive feedback from their peers. This allowed them to work on their time management skills and relax some of the anxiety around presenting.

Workshop 12

During Workshop 12, scholars and families had the opportunity to reminisce on the Science Project season and share their feedback on the Science Expo. They used the Science Expo QR code to share their thoughts before coming together as a group to discuss. Scholars and families described what they appreciated and how they think the event and season can be even more spectacular next year!

Workshop Summary

YMWIC is built on a foundation of community building and collaboration. Our Scholars and their families are our biggest asset. If you attended the Science Expo and have not gotten the chance to share your thoughts—we want to hear from you! Please use this QR code to share your thoughts.
