

Full Spectrum CBD Hemp Salve+ Natural Terpenes | 500 mg 2 oz \$49

Synergistic Terpenes from Essential Oils: Lemongrass, Lavender, Sage, Rosemary, Juniper Berry
Essential oils contain naturally occurring Terpenes also found in cannabis that either directly or indirectly stimulate your endocannabinoid system.

Utilize the Synergy between this full spectrum CBD extract and naturally occurring terpenes in this added blend of essential oils, formulated to maximize the "entourage effect" of this full spectrum CBD product.

What are Terpenes? Terpenes are fragrant oils that give cannabis its aromatic diversity. These oils are secreted in the flower's sticky resin glands, the same ones that produce CBD as well as its other many cannabinoids. Terpenes are naturally occurring in many herbs, fruits, and plants as well. These Terpenes are being intensely studied for their ability to directly and indirectly stimulate our endocannabinoid system, attributing to a wide array of synergistic possibilities.

To maximize the synergy of this full spectrum CBD oil, we add a blend of 5 essential oils that naturally contain 6 terpenes of interest:
