

## COVID-19 Vaccine Winter Booster 1a:

Identify ATAGI recommended groups due for a winter booster shot

<b>Recipe Name:</b>	Identify priority patients over 65 years of age due for a winter booster shot
<b>Rationale:</b>	<p>ATAGI has recommended that all at risk patients who have received immunocompromised dose or a booster dose of vaccine 3 months or more ago are eligible for a winter booster shot if they belong to one of the following groups:</p> <p>High Risk Group:</p> <ol style="list-style-type: none"> <li>1. Age 65 years and older</li> <li>2. Aboriginal and Torres Strait Islander peoples aged 50 years and older</li> <li>3. Age 16 years and older and are severely immunocompromised</li> </ol> <p>Recommendation for other age groups:</p> <ol style="list-style-type: none"> <li>1. Adults aged 50 to 64 years recommended to receive a winter booster dose.</li> <li>2. Adults aged 30 to 49 years can receive a winter booster dose, however the benefit for people in this age group is less certain.</li> </ol>
<b>Target:</b>	<p>Patients aged 65 years or older</p> <p>Patients aged 50 to 64</p> <p>Patients aged 30 to 49</p>

Recipe Limitations:	<p>This report relies, among other details, on coded diagnoses in the patient record. As this is a requirement for accreditation and is also relevant for PIP-QI, we recommend to improve coding of conditions for all clinicians. Here are some helpful links:</p> <p><a href="#">Data Cleansing Report Details</a></p> <p><a href="#">Bulk clean up of free text diagnosis - BP users</a></p> <p><a href="#">Bulk clean up of free text diagnosis - MD users</a></p>
CAT Starting Point:	<ol style="list-style-type: none"> <li>1. CAT Open - CAT4 view (all reports) loaded</li> <li>2. Population Extract Loaded and Extract Pane "Hidden"</li> </ol>

## Filter Steps:

- On the "General" Tab, enter the Start Age = 65
- Or enter Start Age = 50 and End Age = 64
- Or enter Start Age = 30 and End Age = 49

General	Ethnicity	Conditions	Medications	Date Range (Results)	Date Range (Visits)	Patient Name	Patient Status	Providers	Risk Factors	MBS Attendance	Saved Filters
<b>Gender</b> <input type="checkbox"/> Male <input type="checkbox"/> Female <input type="checkbox"/> Other <input type="checkbox"/> Not Stated			<b>DVA</b> <input type="checkbox"/> DVA <span>&lt; Any Color &gt;</span> <input type="checkbox"/> non DVA		<b>Age</b> <div>Start Age <input type="text" value="65"/></div> <div>End Age <input type="text"/></div> <input checked="" type="radio"/> Yrs <input type="radio"/> Mths <input type="checkbox"/> No Age		<input type="radio"/> Last Visit <input type="radio"/> First Visit <input checked="" type="radio"/> Any <input type="radio"/> None <input type="radio"/> < 6 mths <input type="radio"/> < 15 mths <input type="radio"/> < 24 mths <input type="radio"/> < 30 mths <input type="radio"/> Date Range			<b>Activity</b> <input checked="" type="radio"/> Any <input type="radio"/> Active (3x in 2 yrs) <input type="radio"/> Not Active Visits in last 6 mths ≥ <input type="text" value="0"/>	
			<b>Health Cover</b> <input type="checkbox"/> Medicare No. <input type="checkbox"/> No				<input type="radio"/> < 6 mths <input type="radio"/> < 15 mths <input type="radio"/> < 24 mths <input type="radio"/> < 30 mths <input type="radio"/> Date Range				

- Use the [date range result filter](#) to exclude any COVID-19 vaccines given less than three months ago:

^ Filter

General
Ethnicity
Conditions
Medications
Date Range (Results)
Date Range (Visits)
Patient Name
Patient Status
Providers
Risk Factors
MBS Attendance

**Date Range for Last Recorded Result or Event**

The date range selected will filter out results or events that are not within the selected period and treat them as not recorded. This filter is not applicable to graphs that display

☐ All
☐ ≤ 6 mths
☐ ≤ 12 mths
☐ ≤ 15 mths
☐ ≤ 24 mths

☒ Date Range (from - to)

06/07/2022
06/04/2022

Best Practice, Live Database; Extract Date 06/07/2022 2:39 PM; Filtering By: Last Results 6/07/2022 to 6/04/2022

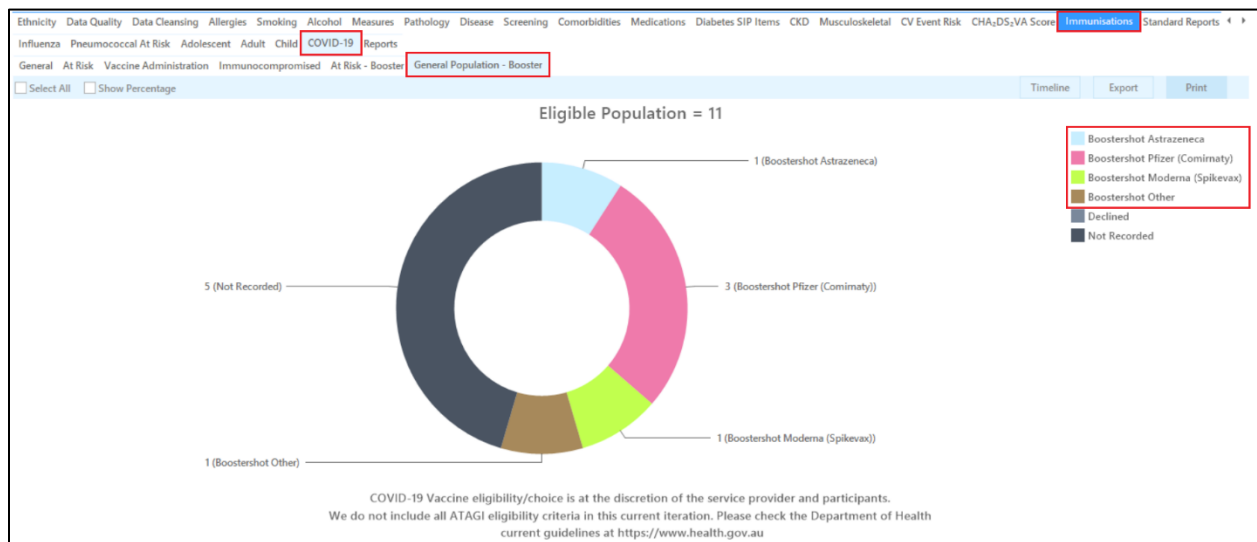

In the example above my data is from the 06/07/2022. To only see patients who have received their vaccine three months or more ago I applied a date range filter that will show only those vaccines given after the 06/07/2021 (the exact date is not important, but it needs to be set to before the start of vaccine rollout) and the 'to' date needs to be three or more months from the date of your extract. In my case 06/07/2022 - three months is 06/04/2022.

- Apply the filter by clicking on the recalculate icon on the top right of your screen:

## Report Steps:

- Click on the Immunisations/COVID-19/General Population-Booster
- Then click on the Boostershot AstraZeneca, Boostershot Pfizer, Boostershot Moderna and Boostershot Unknown in the legend to select only those patients who had boostershot already

- Click on the 'Export' button to see the list of patients who had received a booster shot three months or more ago:

## Using Recall CAT in Recipes

### Optional: Use Recall CAT SMS and voice messages for patient recall

Full details are here: [Recall CAT](#)

After you have applied one or more filters and/or cross tabulations and have selected the group of patients of interest, you will see the choices for SMS Recall and other options at the bottom of the patient re-identification report. This can be applied to all of our [CAT Recipes](#) or any custom search you want to perform.

CAT Starting Point:

The Patient Reidentification window displays your list of filtered patients.

**Patient Reidentification**

Refine Selection Add/Withdraw Patient Consent GoShare Plus SMS Recall Voicemail Recall Topbar Prompt

## Customising Steps:

You can refine the selection manually by clicking the 'Refine Selection' button.

If you click on "SMS Recall", the "SMS Recall" window will be displayed with the name of your clinic. Enter a message that relates to the purpose of the notification. There are a number of options under the inclusion criteria:

- Patients who have opted out of receiving SMS from your clinic are removed by default
- Linking your online booking system to the SMS recall
- Include the opt-out message in the SMS for patient to "STOP" receiving SMS notifications sent through CAT4

Clicking on "Send" will send the message to all patients with a valid mobile phone number in their record. A confirmation message will prompt you with the number of messages to be sent and the required credits. Click yes to send the SMS recall.

## SMS Recall

**SMS Text:**

From Pen CS Pty Ltd: test message
