**PS** ENGINEERING®  
INCORPORATED  
Sound Quality. Sound Engineering.

State of the Art  
Aircraft Audio  
Control Systems

*Flying Never Sounded So Good®*

**While we may not have many floors in our buildings,  
we have one great story. Audio control has been  
our only business since 1985 – we are single-minded  
in the pursuit of audio control perfection**

**It's no wonder why PS Engineering has brought more audio control  
innovations to GA than any other company....period.**

**PS Engineering's team is dedicated to design, build, and support their world acclaimed audio selector panels and intercoms. As a result, PS Engineering was recognized by the Aircraft Electronics Association (AEA) for the second time, as their Associate Member of the Year. Awarded in 1997 and most recently in 2014.**

**In 1985, two electrical engineers, one a pilot the other a circuit designer, found themselves wondering when the revolution would come to the field of audio control. At the time, aircraft intercoms and audio panels had seen virtually no improvements in over a decade. With new digital circuitry and technologies, they believed it was time for the revolution to begin.**

**If these two guys hadn't founded PS Engineering, the community of pilots would probably still be waiting for the revolution to begin.**

- First to provide individually adjustable VOX circuitry
- First to introduce an FAA approved stereo audio panel with intercom and marker beacons, all in the same unit
- First to fully integrate music with Soft Mute technology, allowing flexible music control Patent no. 4,941,187
- First to provide Swap capability, Patent no. 5,903,227; 6,160,496
- First to provide true hands-free VOX system, the IntelliVox® Patent no. 6,493,450
- First to provide an integrated aural warning system into an audio panel
- First to use digital signal processing to record aircraft radio, allowing playback of aircraft radio receptions
- First to introduce AMP™, (Active Microphone Processor) a system that removes noise from the microphone
- First to provide Bluetooth® integration, allowing phone calls and music to seamlessly connect to audio panel
- First and only company to commercially implement USAF patented technology for True Dimensional Sound Patent no. 7,391,877

**When you see innovation in audio, chances are, it is from PS Engineering.**

**Flying Never Sounded So Good®**

## AUDIO PANELS

### Why so many audio panels?

The reason we designed all these audio panels wasn't to confuse our customers; but rather to provide solutions to match our customers' needs. We recognized early on that one size does not fit all.

### Certified

PAR200A – World's first audio selector panel that functions as a hi-fi stereo intercom with Bluetooth® and controls a remote mounted Com radio.

PMA450B – A slide-in replacement for the GARMIN\* GMA340 and the PMA8000 Series. This Digital Audio Selector Panel provides IntelliAudio® Dimensional Sound, Graphics Display Control User Interface, 6-place IntelliVox® and hi-fi stereo with Bluetooth® interface.

PMA4000 – A small form-factor was the design goal for this little jewel. Capable of being panel mounted like an intercom or in a 2 1/4" round instrument hole, the PMA4000 also provides a four-place mono intercom with IntelliVox® and speaker amplifier.

PMA6000B – Low cost solution. This is the only audio panel we know that includes an intercom and a marker beacon receiver selling for less than \$1095.

PMA7000 Series – Pin-compatible to the KMA24, these audio panels incorporate IntelliVox® and enhanced capabilities such as full duplex wireless telephone, and audiophile stereo music inputs. Three systems to choose from.

PMA8000 Series – Designed as Plug 'N Play with the GARMIN\* GMA340, these audio panels includes a complete feature set with IntelliVox® digital recorder, front panel configuration control, monitor mode, with optional Bluetooth® and IntelliAudio®.

PAC24 – This specialty audio panel is suitable for special mission use, such as police/rescue/ fire patrol, and includes provisions for observer position. Single and dual systems available.

PAC45 – This all digital audio controller is well suited for the demanding cockpits where many radios may be heard simultaneously. MultiTalker™ allows the pilot to place these Coms in unique positions within the stereo headset. Add Bluetooth®, audio alerts, and AMS pin compatibility, the PAC45 bring an unprecedented amount of capability at a very low cost.

### Experimental

PDA360EX – The fundamental advantage of the PDA360EX over conventional audio panels for the homebuilt aircraft is that is uses the same technology as its big brother, the PMA450B.

### IntelliVox®

PS Engineering's revolutionary IntelliVox® intercom squelch protocol harnesses the computational power of microprocessors, and eliminates complicated squelch adjustments. In addition, by using independent, automatic microphone squelch circuits, extraneous cabin noise is minimized. IntelliVox® means that the system will always be optimized, tailoring itself for different microphones, as well as variations in voice and sound levels in the cockpit. With IntelliVox® you'll have seamless and clear communications.

### IntelliAudio®

Using patented technology licensed from the Air Force Research Laboratory at Wright Patterson AFB, IntelliAudio® places multiple audio sources in positions within stereo headsets. These dimensional sound locations allow the Pilot to more easily focus on a particular radio conversation of interest.

### ProSupport™

All of our audio panels include PS Engineering's ProSupport Warranty. Depending upon the audio panel installed, the unit will come with either a 1, 2, or 3 year guarantee that if the unit was installed by an authorized PS Engineering Dealer or a custom wire harness was purchased from PS Engineering, a warranty exchange unit will be shipped the same day of the issuance of an RMA.

## PAR200A

Radio

### TECHNICAL SPECIFICATIONS

PAR200A Audio Panel and Radio	- FAA - TSO - EASA - ETSO
Audio Selector/Intercom	FAA TSO-C139
Communications Transceiver	FAA TSO-C169a (PARTIAL)
Environmental Qualification DO-160G	A1C1BAESRXXXXXX B(XX) ABATBXXA2E2 XXX
Operating Temperature Range:	-20° C to 55° C, short term -40° C to +70° C
Altitude:	35,000 feet
PAR200A Unit Weight	1.1 lb. (0.49 kg)
Rack with connectors	0.51 lb. (0.24 kg)
Voltage:	11-33 VDC
Maximum Current:	2.5 Amp (Externally protected by a 3A pull-type breaker)

#### AUDIO SELECTOR SPECIFICATIONS

Audio selector panel input impedance:	510 Ω
Input Isolation:	-60 dB (min.)
Receiver Inputs:	4 (Com 1, Com 2, Nav 1, Nav 2)
Unswitched Inputs:	4
Transmitter Selections:	3 (Com 1, Com 2, Com 1/2)
Headphone Impedance:	150 – 1000 Ω
Headphone Output:	30 mW each headset, no clipping <1% THD typical into 150 Ω
Speaker Output (into 4 Ω) with no clipping	
14 VDC: 3 Watts (min.)	28 VDC: 10 Watts (min.)
Microphone Impedance:	150 - 600 Ω
Intercom Positions:	4-place IntelliVox® ICS
Music Inputs:	2 (Independent, Stereo)
Distortion:	<1% THD @ 30 mW into 150 Ω
Mic Freq. Response, 3 dB:	300 Hz - 6000 Hz
Music Freq. Response, 3 dB:	20 Hz - 20 KHz

#### COM RADIO TRIG TY91

Channels (Transmit & receive)	760 channels, 25 KHz spacing 2280 channels, 8.33 KHz spacing 118.000 – 136.992 MHz
Power consumption Receive (no signal)	2.8W @ 14VDC
Transmit	3.2A
Input Voltage	11-33 VDC 5A Circuit Breaker.
Power output	6 watts (nominal) VSWR Tolerance < 2:1 for best operation (5:1 without damage)
Receiver sensitivity	-6dB SINAD @ 5µV (1KHz audio with 70% modulation)
Temperature range	-20 to +70 degrees Celsius
Dimensions	W-2.5" x H-1.9" x D6.3" (plus 1.5" for harness) W-66mm H-48mm x D-160 (plus 35mm for harness)
Weight	0.77 lbs (0.350 k)
FCC ID:	VZI00882

#### WARRANTY

2-year Pro-Support exchange program, when installed by an authorized PS Engineering Dealer. After the warranty expires, a fixed repair fee will cover any repair. See Warranty information in the Installation Manual.

#### ORDERING INFORMATION

## PMA450B

### CHECKLIST OF CAPABILITIES:

- Com 1, Com 2, Nav 1, Nav 2, Aux 1, Aux 2 (Aux switched inputs can be labeled)
- IntelliAudio® provides dimensional sound for easy discernment of simultaneous radio sources
- Optional Marker Beacon Receiver
- Volume light bar indicates various volume Levels
- 3 Customizable switched inputs. Pilot creates custom labels to fit specific aircraft equipment list.
- 6-place hi-fi stereo intercom with limitless distribution capability and 3 music mute modes.
- USB-C charger for portable devices including iPhones® or iPads®.
- Adjustable volume levels for Speaker, Music 1, 2, and Bluetooth® inputs, unswitched inputs and the optional Marker Beacon Receiver
- Two hardwired music inputs as well as two Bluetooth® music inputs
- Audiophile intercom, aircraft radio and music fidelity.
- Extremely quiet digital intercom system.
- No computer programming required, front panel configurable.

### TECHNICAL SPECIFICATIONS

Approval Basis	FAA TSO C139a, C35d, C71
Certification Documents	RTCA, Inc. DO-143, DO-160G, DO-214A, DO-178C, DO-254
Intercom	6-place Stereo
Transmitter Selections	4 (Com 1, Com 2, Com 1/2 Split, Bluetooth TEL)
Switched Receiver Inputs	6 (Nav 1, Nav 2, MKR, AUX 1, AUX 2, AUX 3)
Portable Electronic Device Charging Port	+5.0VDC, 15 Watts from USB-C connector
Unswitched Inputs	4-configurable
Power Requirements	11-33 VDC, 3.5 Amps
Audio Output Power	Speaker: 3 Watts (14V), 10 Watts (28V) Headphone: 35mW each headset, no clipping <1% distortion typical
Audio Frequency Response	+/- 3db, 300 Hz to 6000 KHz
Entertainment Frequency Response	+/- 3db, 20 Hz to 16 KHz
Music Inputs	3 (independent and user configurable)
Weight	1.5 lbs (with tray & installation kit)
Dimensions	Height: 1.3 in. (3.3cm) Weight: 6.25 in. (16.9cm) Depth: 7.15 in. (18.16cm)
Environmental Qualifications	RTCA DO-160G
Temperature Range	Operating -20° to +55° C, Short Term Operating -40° to +70°
Altitude	35,000 feet
Available Marker Receiver	75 MHz, Crystal Controlled, receiver and indicator
External Marker Outputs	Lights and MM sense output

## PMA4000

The PMA4000 is an audio panel that provides switching of two Coms and two Navs. It has a 4-place mono IntelliVox® intercom, and can be configured for PTT intercom. Four unswitched inputs are available.

Includes a built-in speaker amplifier. Hear aircraft radio audio through the headsets or over the cabin speaker by a press of a pushbutton.

The PMA4000 has PS Engineering's revolutionary IntelliVox® intercom squelch protocol. A mode switch allows the Pilot to select either ISO or ALL intercom modes.

Independent intercom volume controls for the Pilot and the Copilot. Because this system was designed with the tandem cockpit in mind, the Copilot volume can be mounted in another location. The volume controls only the intercom, the radio volume is adjusted by the radio controls.

The PMA4000 provides a monaural entertainment input. With our SoftMute™, the music mutes, allowing undistracted communications.

### TECHNICAL SPECIFICATIONS

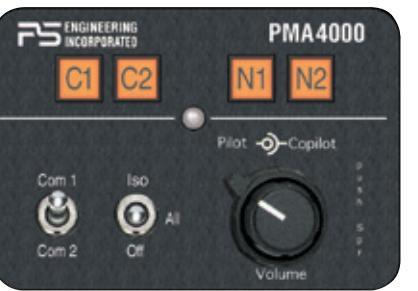

Approval Basis	FAA-TSO C50c (11942)
Input power	12-28 Volts Current Drain: < 250 mA
Headphone Impedance	150-1000 Typical
Audio Distortion	<1% THD @ 38 mW into 150
Speaker Output	3 Watts @ 14 Vdc 10 Watts @ 28 Vdc
Aircraft Radio Impedance	510
±3 dB Music Freq. Response	200 Hz-18 KHz

### ORDERING INFORMATION

### PART NO.

PMA4000 4-Place Intercom	11942
Audio panel with 4-place intercom with Isolate and ALL modes, single music input, FAA-TSO Weight: 15 ounces Dimensions: 1.70" H X 2.43" W X 6.50" D	
2 1/4" round mounting plate	575-004-0001
Allows installation in a standard 2 1/4-inch instrument hole.

## PMA7000 Series

PMA7000BT

## PMA6000B

The PMA6000B has been given the benefit of PS Engineering's years of audio panel control design and manufacturing experience. It offers a low cost alternative to the more capable audio panel product line that the industry has come to expect from such a focused and driven company.

This audio selector panel has our original "Set it and Forget it" manually adjusted VOX intercom and a slew of features to enhance versatility and utility.

Swap function allows selection of Com 1 or Com 2 from remote pushbutton. Fail-safe feature automatically hard-wires the Pilot to Com 1 in the case of an outage. Uses a single 44-pin connector making installation easier.

The PMA6000B holds FAA TSO and EASA ETSO and was designed to be made easier to install using a single 44-pin Sub-d connector.

### ORDERING INFORMATION

**Warranty:** 1-Year Pro Support Exchange Program, when installed by an authorized PS Engineering Dealer

### TECHNICAL SPECIFICATIONS

Approval Basis	FAA-TSO C50c, C35d EASA ETSO C50c, C35d
Certification Documents	RTCA DO-160B, DO-178B, DO-143
Intercom	4-place Mono
Transceivers	2 (Com 1, Com 2)
Receiver Inputs	6 (Nav 1, Nav 2, ADF, DME, AUX, MKR)
Marker Beacon	Internal (optional)
Unswitched inputs	2
Power Required	11-33 VDC, 1.5 A
Power consumption	Speaker ON: 600mA OFF: 350 mA
Output power	Speaker: 3 W into 4Ω Headphone: 50 mW into 150Ω, <1% THD
Audio Frequency Response	±3dB, 350Hz-6,000Hz
Entertainment Frequency Response	±3dB, 200Hz-15,000 Hz
Weight	0.8 lb.
Dimensions	6.25" W x 1.3" H x 7.15"
Environmental Conditions	DO-160B
Temperature Range	A1D1/CAMXXXXXBBBAAX -20° C to +55°, with brief operation at +70° C
Altitude	50,000 feet, unpressurized
Marker Receiver	75 MHz crystal controlled with external marker lights and MM sense output

## PMA7000BT

PMA7000BT

This IntelliVox® enabled 6-place hi-fi stereo intercom makes adjusting VOX a thing of the past. 3-Com capability connects either a HF/VHF radio or can be connected to a full duplex telephone. Alternate Intercom Mode allows the passengers to be on the intercom but won't hear any radio activity and when the radio does become active, the crew will not hear the passenger. Split mode allows the pilot to be on one Com while the copilot on another, enjoy the benefit of off-loading some radio work to your copilot.

## WARRANTY

2-year exchange program, when installed by an authorized PS Engineering Dealer. After the warranty expires, a fixed repair fee will cover any repair. See Warranty Information in Installation manual for full details.

Altitude	50,000 feet, unpressurized
Marker Receiver	75 MHz crystal controlled receiver
External Marker	Lights and MM sense output

## PMA7000 Series

Bluetooth™

PMA6000

You can have this new one.

If you have installed our original mid-1990's PMA6000 series audio panel in your avionics stack, this Plug 'N Play audio panel will provide a tremendous upgrade for those panels without any rewiring at all. The only thing that is required for installation is a 3/32" Allen Wrench.

Having all of the capabilities of the PMA7000BT with the exception that the music is monaural not stereo, this upgrade will provide IntelliVox®, a significantly improved user interface, and the ability to make phone calls and streaming music via Bluetooth®.

This expanded version of the PMA7000B includes a 10-place intercom and an optional Cockpit Voice Recorder (CVR) output. For environments where having a Hot Mic is beneficial, the PMA7000H not only has IntelliVox® but also has provisions for Push-To-Talk Intercom. This capability is especially useful when there may be direct wind noise on the microphones or the cockpit din is just too high for any VOX circuit to work. Now available with wireless Bluetooth® capability.

PMA7000H

## The Aviation Consumer

June 2011 "Does It All"

## PMA8000 Series

PMA8000B

If you have this old one...

PMA7000M

### CHECKLIST OF CAPABILITIES:

- IntelliVox® automatic VOX system with individually gated microphones
- 6-Place monaural intercom with Soft Mute™
- Two music mute modes: Mute On and Mute Off
- Improved built-in Marker Beacon Receiver
- Cellular telephone input and music streaming (Bluetooth®)
- Split mode for dual transmit capability
- Three Isolation modes - Pilot Isolate, All, and Crew
- Four unswitched inputs
- Selectable special intercom mode with "Alternate Intercom Mode"

The PMA8000 Series Audio Selector Panel is the original GARMIN GMA340\* Plug 'N Play audio panel. This makes upgrading for the aircraft owner who owns the GMA340 to the more capable PMA8000 as easy as sliding one out and sliding one back in.

For pilot's who need more from their audio panel to meet their mission, there are several models to choose from, starting with the PMA8000B all the way up to the PMA8000E, a true dual audio panel system.

There are several advanced functions that can be accessed by the front panel pushbuttons.

- Alternate Intercom Function places everyone on the intercom but the passengers will hear no aircraft radio and when the aircraft radio is active, the crew will not hear the passengers.
- Music Distribution allows front panel selection on how music 1 and music 2 will be distributed within the aircraft. There is also front panel control of music volume
- The Monitor Function allows the primary radio to mute the secondary radio, making it easier to catch ATC calls when you are listening to ATIS

### TECHNICAL SPECIFICATIONS

Approval Basis	FAA TSO C35d, C50c EASA ETSO C50c, C35d
Certification Documents	RTCA/DO-214 RTCA/DO-143 RTCA/DO-160D RTCA/DO-178B DO-254
Intercom Transmitter Selections	6-place Stereo
Receiver Inputs	4 (Com 1, Com 2, Com 1/2, TEL)
Marker Beacon	6 (Nav 1, Nav 2, ADF, DME, MKR, AUX)
Unswitched Inputs	Internal
Power Requirements	5 - including front panel jack
Output Power	11 to 33 VDC, 2.5 Amp
Speaker Output	3 Watts (14V), 10 Watts (28V)
Headphones	38mW each headset, no clipping <1% distortion typical
Audio Frequency Response	±3 dB, 300 Hz - 6000 Hz
Entertainment Frequency Response	±3 dB 20 Hz - 18 kHz
Weight	1.85 lb.
Dimensions	Height: 1.3 in. (3.3 cm) Width: 6.25 in. (16.9 cm) Depth: 7.15 in. (18.16 cm)
Environmental Qualification	RTCA DO-160D, A1D1CABSMXXXXXZBABTBXXE2XXX
Temperature Range	-15° C to 55° C
Altitude	50,000 feet, unpressurized
Marker Receiver	75 MHz, Crystal Controlled
External Marker Outputs	Lights and MM sense output

### CHECKLIST OF CAPABILITIES:

- IntelliVox® automatic VOX system with individually gated microphones
- Split mode for independent transmit capability
- 6-Place hi-fi stereo intercom with Selectable Muting Modes
- Monitor Function which allows automatic muting of the non-primary radio
- 4 - Music Mute mode: Mute On, Mute Off, Radio Mute, Intercom Mute
- Dedicated front panel music volume control
- Built-in Marker Beacon Receiver
- Cellular telephone input with "DuTel™" telephone distribution
- Easy front panel control for telephone sidetone on/off
- Continuous Loop Digital Aircraft Radio Recorder
- Front panel jack for phone, iPod, or unswitched audio warnings
- 2 - Hi-fidelity stereo music inputs (no ground loop noise)
- 3 - Isolation modes - Pilot Isolate, All, and Crew
- 5 - Unswitched inputs, including front panel jack
- Selectable Music Distribution
- Selectable Intercom Mode with special "Alternate Intercom Function"
- RAM (Radio Active Mute) eliminates constant background noise

PMA8000B-VRT

### WARRANTY

3-year Pro-Support exchange program, when installed by an authorized PS Engineering Dealer. After the warranty expires, a fixed repair fee will cover any repair. See Warranty Information in Installation manual.

## PMA8000 Series

The PMA8000G marks another major milestone in the company's innovative history. This audio panel has significant advancement in audio panel technologies. It will fit pilots who expect more from their audio panel while not adding any additional workload or complex set of push button sequences. The PMA8000G is a natural choice for pilots who demand ease of use with a deep set of audio panel capabilities.

Introducing *flightmate*<sup>®</sup> the first system ever to be available in an audio selector panel. The pilot can create checklists, emergency procedures, just about anything that pilot can say, he can store into non-volatile memory, making those checklist chores a bit easier.

IntelliAudio<sup>®</sup> is another standard capability that will make listening to multiple radio calls manageable. With Com 1 in the 10 o'clock position and Com 2 in the 2 o'clock position, pilots can pay attention to the radio that is most important at any one instant of time.

Bluetooth<sup>®</sup> Interconnectivity allows the pilot to have access to his Bluetooth<sup>®</sup> enable telephone or entertainment device. The ability to contact ATC by way of the telephone with the engines running and radios tuned and set at an uncontrolled airfield makes getting into the air under IFR condition much easier.

Pilot programmable aural alert annunciations can be programmed right from the front panel of the audio panel while using the pilot's headset microphone to record them. Now you can take up to 4 discrete inputs and have them associated with pre-recorded messages, making it easier to determine exactly what condition needs to be addressed.

And we have included a USB charging port that is rated at 10 watts. This charger provides enough power for iPads that are running the most demanding applications and still be trickle charging the iPad battery.

Finally, ease of use. We took a fresh approach to the user interface, making access to the advanced functions much easier than in past iteration of the PMA8000 series.

### ORDERING INFORMATION

PART NO.
PMA8000G Audio Panel with IntelliAudio <sup>®</sup> , 6-Place IntelliVox <sup>®</sup> stereo intercom, Bluetooth <sup>®</sup> , IntelliAudio <sup>®</sup> , and USB charger.....050-890-0912
With BT Streaming.....050-890-0913

## PMA8000 Series

The PMA8000C provides for an additional communications transceiver. While most aircraft have two Com radios, there are cases where a third transceiver is required. The PMA8000C not only allows the connection of three radios, it also provides 3 unique split transmit modes.

Pilot Com 1 - Copilot Com 2  
Pilot Com 1 - Copilot Com 3  
Pilot Com 2 - Copilot Com 3

This is particularly helpful when there are special missions required. As an example, Com 3 could be a HF or UHF radio. Unlike the GMA340 where only Pilot Com 1 - Copilot Com 2 is offered, the PMA8000C adds this additional flexibility.

### CHECKLIST OF CAPABILITIES:

- Com 1, Com 2, Nav 1, Nav 2 capability
- IntelliAudio<sup>®</sup> True Dimensional Sound gives Pilots the ability to discern important radio calls
- 6-Place hi-fi stereo IntelliVox<sup>®</sup> Intercom with Soft Mute<sup>™</sup>
- Bluetooth<sup>®</sup> enabled allows connection of iPhone, iPads and other PDAs for both music streaming and telephone.
- Monitor Mode allows automatic muting of non-primary radio
- 3 - music mute modes: Mute On, Mute Off, Radio Mute
- *flightmate*<sup>®</sup>
- Cellular telephone input with front panel control of side tone
- Digital aircraft radio recorder (IRS<sup>™</sup>)
- USB Charging port with Auto-Protect, provides up to 10 Watts of power for iPhones, iPads and other PDA Accessories.
- Split mode for dual audio panel capability
- 2 - Differential, hi-fidelity stereo music source inputs (no ground loop noise)
- 3 - Isolation modes - Pilot Isolate, All, and Crew with "Alternate Intercom Mode"
- Selectable music distribution for Pilot, Copilot and passengers

### TECHNICAL SPECIFICATIONS

Approval Basis	FAA TSO C35d, C50c EASA ETSO C50c, C35d
Certification Documents	RTCA/DO-214 RTCA/DO-143 RTCA/DO-160D RTCA/DO-178B DO-254
Intercom	6-place Stereo (8000E up to 14-place)
Transmitter Selections	3 (Com 1, Com 2, Com 3)
Receiver Inputs	6 (Nav 1, Nav 2, ADF, DME, MKR, AUX)
Marker Beacon	Internal
Unswitched Inputs	5 - including front panel jack
Power Requirements	11 to 33 VDC, 2.5 Amp
Output Power	Speaker Output: Headphones: 3 Watts (14V), 10 Watts (28V) 38 mW each headset, no clipping <1% distortion typical
Audio Frequency Response	± 3 dB, 300 Hz - 6000 Hz
Entertainment Frequency Response	± 3 dB 20 Hz - 18 kHz
Weight	1.85 lb.
Dimensions	Height: 1.3 in. (3.3 cm) Width: 6.25 in. (16.9 cm) Depth: 7.15 in. (18.16 cm)
Environmental Qualification	RTCA DO-160D, A1D1CABSMXXXXXZBABATBXXE2XXX
Temperature Range	-15° C to 55° C
Altitude	50,000 feet, unpressurized
Marker Receiver	75 MHz, Crystal Controlled
External Marker Outputs	Lights and MM sense output

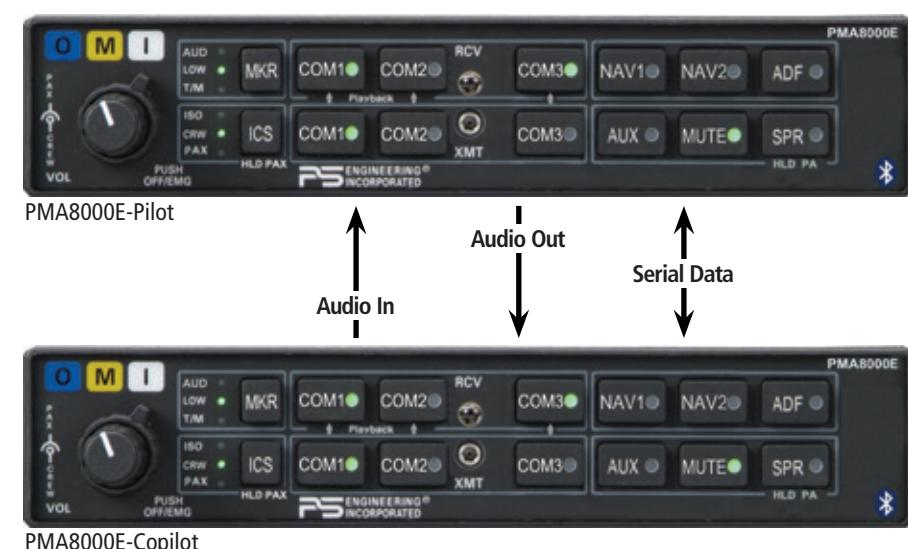

### WARRANTY

3-year Pro-Support exchange program, when installed by an authorized PS Engineering Dealer. After the warranty expires, a fixed repair fee will cover any repair. See Warranty Information in Installation manual.

## PAC24

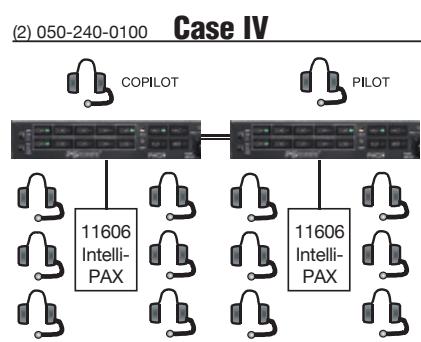

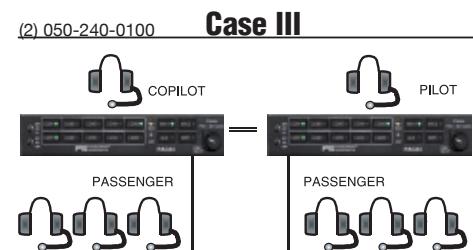

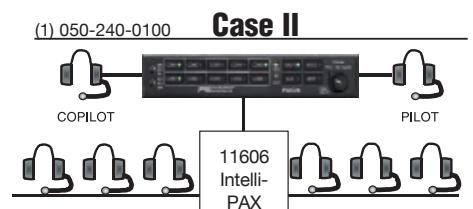

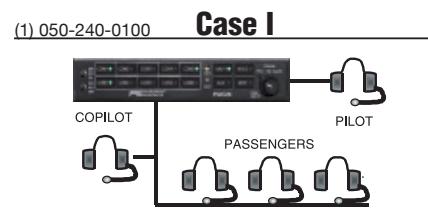

The PAC24 was designed as a versatile audio system that meets the needs of airborne law enforcement, EMS, forestry, and special mission aircraft.

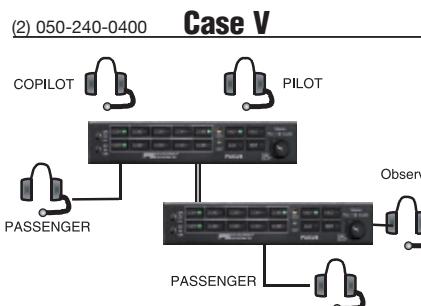

Best yet, the recently updated PAC24 is designed to be easily retrofit into the same installation as a King KMA24H (-71). This makes adding modern, flexible, audio control and a high performance intercom easy and cost effective into aircraft with aging audio panels.

The PAC24 contains PS Engineering's legendary IntelliVox® intercom and the headphone amplifier is the most powerful and cleanest in its class, delivering 120mW of punch to overcome the loudest cockpit environments.

The PAC24 has all the features you expect from PS Engineering, like swap™, split mode, duplex mode, and 3-year warranty. Designed from the beginning as a dual-capable system, the PAC24 offers outstanding

Case	PAC24	Expansion Unit	Pass	Crew Mode
I	Single	No	3	No
II	Single	Yes	6 or 8	Yes
III	Dual	No	6 (3+3)	No
IV	Dual	Yes	14	Yes
V	Observer	No	2	No

## MultiTalker™

## Bluetooth™

## PAC45

### CHECKLIST OF CAPABILITIES:

- Six (6) Com radio interfaces with True Dimensional Spatial Processing
- Up to 3 individual control heads via RS-422
- Custom legends are quick and easy to order for professional tailored form and function
- Satellite Radio interface with full duplex phone
- Seven-place intercom with Auto and PTT-ICS VOX
- flightmate® field recordable audio alerts system
- Six (6) switched inputs Note: AUX switches 3 inputs
- Bluetooth interface for wireless phone and A2DP
- 1.88" DZUS mount backward compatible NAT AMS
- Night Vision compliant to ANVIS III
- Radio volume controls with pop-out switches
- Public Address Output
- FAA TSO C139a

## Special Mission Audio Controller

For the special mission pilot, where hearing many radios all at the same time is part of the job, and differentiating specific radio calls is not an easy task. That is until now.

MultiTalker™ offers this unique capability to the special mission pilot, the ability to pay attention to the radio call that is important at any one instant in time. MultiTalker™ allows the pilot to place 6 individual com radio traffic, up to nine unique positions within a stereo headsets.

The PAC45 is pin compatible with the NAT AMS series making upgrading replacing legacy systems easier.

## For Experimental Aircraft Only

## Bluetooth™

## PDA360EX

The little brother to the PMA450B, this audio panel packs a tremendous amount of capability in a non-certified setting, eliminating the high costs of certifying a software based audio panel.

IntelliAudio® is probably the most important new function that has been brought to the pilot community in the last decade. The pilot can place Com 1 in one position in their stereo headset and Com 2 in another. This allows the pilot to take advantage of the "cocktail party effect," paying attention to the radio that is most important at any one instant in time.

The 10-Watt USB charger will come in handy when your iPad battery becomes low. This USB charger will not only operate the iPad but will trickle charge it at the same time.

PDA360EX packs a tremendous amount of capability in a Plug 'N Play configuration with GARMIN's GMA340 or GMA240.

### CHECKLIST OF CAPABILITIES:

- Com 1, Com 2, Nav 1, Nav 2 capability
- IntelliAudio® True Dimensional Sound gives Pilots the ability to discern important radio calls
- 4-Place hi-fi stereo IntelliVox® Intercom with Soft Mute™
- Bluetooth® enabled allows connection of iPhone, iPads and PED
- 3-Softkey User Interface with integrated Graphics Display
- Monitor Mode allows automatic muting of non-primary radio
- 3 - music mute modes: Mute On, Mute Off, Radio Mute
- Volume controls for Intercom, Un-switched Inputs, Telephone, and Music Inputs
- Cellular telephone input with front panel control for volume
- Digital aircraft radio recorder (IRS™)
- USB Charging port with Auto-Protect, provides up to 10 Watts
- Split mode for dual audio panel capability
- 2 - Differential, hi-fidelity stereo music source inputs
- 3 - Intercom modes - Pilot ISO, All, Crew and "Alternate Intercom Mode"
- Selectable music distribution for Pilot, Copilot and passengers

# INTERCOMS

## PM1200

The PM1200 is designed for the noisiest of aircraft, including open cockpit and warbird aircraft. The Active Microphone Processor (AMP) uses emphasis and de-emphasis to strip much of the background noise out of the intercom audio.

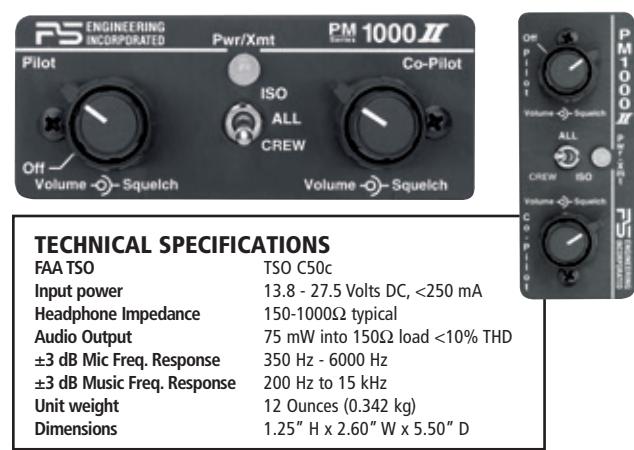

The PM1200 provides both our IntelliVox® auto-squelch and Push-to-talk intercom (PTT-ICS) so that when the cockpit noise is too high for VOX operation, a press of the Copilot's volume control places the PM1200 into PTT-ICS mode.

And for those pilots who like to wear ear plugs while wearing headsets, the PM1200 has the ability, when connected to a 24 volt system, of providing up to 120mW! Now that's a lot of audio punch!

### ORDERING INFORMATION

### PART NO.

## PM1000II

The PM1000II is a 4-place panel mounted intercom with VOX. Individual volume and squelch controls for the crew reduces the number of microphones that are on at any one time, reducing the din of the cockpit.

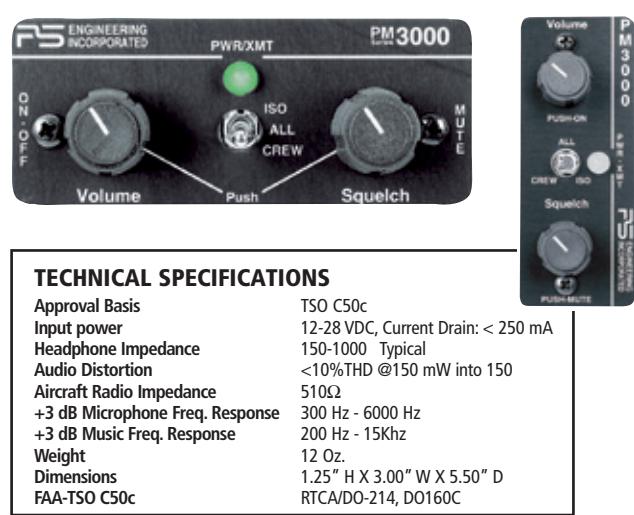

The standard PM1000II (11922) provides Pilot Isolate and All modes. The PM1000II with Crew (11920) has the additional capability of separating the passengers from the crew.

This design makes it easy to balance intercom, radio and music volume levels. And with Soft Mute®, the Pilot will never miss a radio call because the monaural music is automatically muted.

### ORDERING INFORMATION

### PART NO.

## PM3000

The PM3000 has its roots in the first available stereo intercom, the PM2000. With audiophile stereo music sound, this panel mount provides high-quality intercom and aircraft radio audio, while Soft Mute® provides the Pilot the ability to select having the muting function turned on or off. This eliminates the need for constant changes in the stereo music when the aircraft radio becomes active.

The VOX in the PM3000 earned the reputation "Set it-Forget it, it's the most forgettable intercom you'll ever use." The single VOX control sets the trip level for the Pilot, Copilot, and passengers microphones, reducing the number of microphones that are on at any one time.

The PM3000A (11931A) has 2-unswitched audio inputs while the PM3000 (11932) provides the additional function of Crew mode. In this setting, the passengers are on one intercom while the crew on another.
