This is an excellent class for a small business owner to consider to prevent their computer systems from becoming hacked.
Please contact the Kern Center (419-559-2464) if you have questions.

NEW! Introduction to Cyber Security

The #1 reason organizations get hacked is a lack of knowledge! #2 is not having the proper policies in place. Gain knowledge of the different types of malware and attacks, understand the importance of safe on-line behaviors, and develop the skills to protect your organization from attacks.
After taking completing the five chapters and passing the exam, you will receive a certificate of completion from the Cisco Networking Academy.
