UNDERSTANDING TARGETED CYBER ATTACKS

AWR-376

AWR-376 provides students with specific information regarding targeted cyber attacks, including advanced persistent threats. This information will place them in a better position to plan and prepare for, respond to, and recover from targeted cyber attacks. This course will fill the gap in threat-specific training for cybersecurity as a community-driven course that focuses on the phases of targeted cyber attacks and the attacker methods used during each phase.

Topics

- Advanced persistent threats
- Prevention of targeted cyber attacks
- Mitigation of targeted cyber attacks
- Response to targeted cyber attacks

Course Length

8 hours

CE Credits

IACET - 0.8 CEUs

Target Audience

This course was developed for emergency management, emergency responders, risk management personnel, planners, critical infrastructure representatives from both private and public sectors, information security and cybersecurity personnel and managers, other personnel responsible for identifying and responding to cyber incidents, and those who are involved in developing organizational strategies.

Prerequisites

Register for a FEMA / SID Number (required)
Students must register for and provide a SID number to access the class.
https://cdp.dhs.gov/femasid

Participants

Public and Private Personnel Involved with:

- Critical Infrastructure
- Emergency Operations
- Incident Response.

Recommended, but not required:

- AWR 136 (Instructor Lead) – Essentials of Community Cybersecurity ***(OFFERED ON AUGUST 14, 2019)***
- AWR 175-W (Online) – Information Security for Everyone
- AWR-173-W (Online) – Information Security Basics

Register for the workshop: techprepnwo.org
