ISBN 9781118647202

June 2016 | 600 pages

\$ 114.95 | £ 76.95 | € 105.00

Newly updated, *Agricultural Medicine: Rural Occupational Health, Safety, and Prevention, Second Edition* is a groundbreaking and comprehensive textbook and reference for students and practitioners of public health, and professionals in the field of rural agricultural occupational health and safety. The book introduces specific occupational and environmental health and safety issues faced by agricultural workers and rural residents, and provides a roadmap to establishing sustainable worker and public health support in agricultural communities.

Responding to reader demand, *Agricultural Medicine, Second Edition* now features more case studies, key point summaries, and new international perspective chapters comparing North American health and agricultural practices to those in Europe, the Asia Pacific, and South America.

Agricultural health and safety engages a multidisciplinary team of medical professionals, veterinarians, safety professionals, engineers, sociologists, epidemiologists, and psychologists, for whom this book serves as an essential resource.

"By bringing this fund of knowledge & experience the authors have moved the area of agricultural & rural occupational health & safety forward in the creation of a single volume that pulls the many components of this varied area into a readable and exciting document"

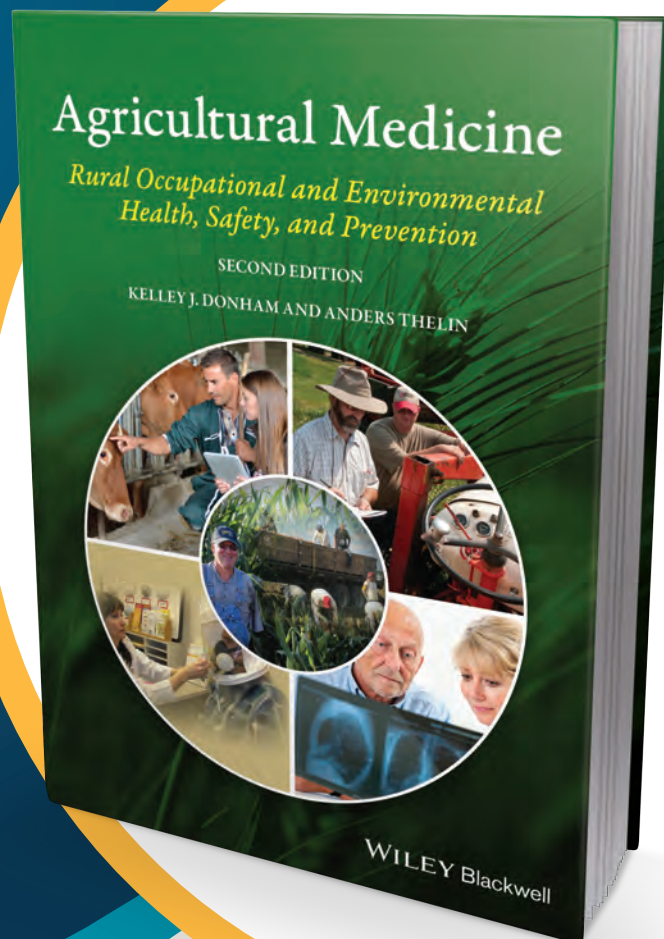

James Dosman MD OC, SOM, FRCPC, ABIM, FRSC

"This updated text includes more content in several chapters such as environmental hazards, physical factors, and zoonotic diseases. I find the rearrangement and addition of content mentioned above particularly useful"

Edward E. "Chip" Petrea PhD

"The authors have collected selected information regarding production processes and risks in agricultural scenarios representative of Western-style agricultural economic development"

Professor Claudio Colosio MD
