MyChild Tamper-Resistant Clamps At-A-Glance

- McRoberts, the oldest security company in America, designed the MyChild Tamper-Resistant Clamp for the specific purpose of positive identification and Mother-Baby-Matching.
- MyChild Tamper-Resistant Clamps can only be purchased from McRoberts Technologies and are only available in MyChild Secure Positive ID Kits.
- MyChild Tamper-Resistant Clamps are numbered to match up with numbered mother bands, numbered partner bands, numbered baby bands and numbered chart stickers.
- MyChild Tamper-Resistant Clamps come sterilized in individual pouches.
- MyChild Tamper-Resistant Clamps are tamper-resistant because of the secure design of the locking mechanism.
- An added security feature is that the secure locking mechanism is not accessible from the front of the clamp.
