

We are the FIRST robotics competition team 8122 Mechanical Mustaches out of Taft High School in Chicago, IL. This past year we won the Midwest Regional at UIC and the Central Illinois Regional at Bradley University. This gave us the opportunity to travel to the Championship in Houston Texas, with this success comes the desire to improve our program. Our team's current goals require better tooling in our team's shop as well as more access to building materials. Our goal is to raise \$15,000 to prepare for another championship bid, build out better tooling in our team's shop and to build out a better inventory of building materials in our shop. This goal is also to help support new member growth that our team expects with the team's success in our past season.
