

MANUFACTURING GUIDELINES

RESTORE ILLINOIS

A Public Health Approach To Safely Reopen Our State

PART OF PHASE 4 OF RESTORE ILLINOIS PLAN

APPLICABLE TO EACH REGION UPON TRANSITION TO PHASE IV | ISSUED ON JUNE 22, 2020

The Revitalization Phase of the Restore Illinois public health approach to reopening the Illinois economy includes gatherings of up to 50 people, additional businesses reopening and increased capacities. We must all continue to social distance, frequently wash our hands and cover our faces to maintain progress in overcoming COVID-19.

This document is applicable to businesses that meet the following criteria:

- Non-customer-facing facilities engaged in the mechanical, physical, or chemical transformation of materials, substances, or components into new products
 - ♦ Examples of manufacturing facilities include (non-exhaustive): plants, factories, mills
- **Note:** organizations that operate across multiple workplace environments should refer to applicable Phase IV guidelines for guidance on those workplaces

Uniform guidelines across businesses, industries and nonprofits within the State of Illinois:

GENERAL HEALTH

i. Minimum guidelines

1. All employees who can work from home should continue to do so
2. Employees should wear face coverings over their nose and mouth when within 6-ft. of others (cloth masks preferred). Exceptions may be made where accommodations are appropriate – see [IDHR's guidance](#).
3. Social distance of at least 6-ft. should be maintained between non-household individuals unless participating in activities permitted under Phase IV guidelines
4. Employers should provide hand washing capability or sanitizer to employees and if applicable, customers
5. Frequent hand washing by employees, and an adequate supply of soap/ paper towels and/or disinfectant/ hand sanitizer should be available

HR AND TRAVEL POLICIES

i. Minimum guidelines

1. All employees and workers who perform work at the worksite (such as temporary or contract workers) should complete health and safety training related to COVID-19 when initially returning to work. Resources to design a training are posted on the [DCEO Restore Illinois guidelines website](#)
2. Employees should follow [CDC travel guidance](#) to protect themselves and others during business travel
3. Employees should not report to, or be allowed to remain at, work if sick or symptomatic (with cough, shortness of breath or difficulty breathing, fever of 100.4 degrees or above, chills, muscle pain, headache, sore throat, new loss of taste or smell, or other [CDC-identified symptoms](#)), and sick or symptomatic employees should be encouraged to seek a COVID-19 test at a state or local government testing center, healthcare center or other testing locations
4. Employers should clearly explain all paid leave policies and make workers aware that they may be eligible for benefits if they are sick or symptomatic
5. Employers should be aware that the Occupational Safety and Health Act of 1970 and provisions of state law prohibit employers from retaliating against workers for raising safety or health concerns

ii. Encouraged best practices

1. Provide reasonable accommodation for COVID-19-vulnerable employees, including but not limited to work from home (if feasible), reduced contact with others, use of barriers to ensure minimum distance between others whenever feasible or other accommodations that reduce chances of exposure

HEALTH MONITORING

i. Minimum guidelines

1. Employers should make temperature checks available for employees and encourage their use. Employers should post information about the symptoms of COVID-19 in order to allow employees to self-assess whether they have any symptoms and should consider going home
2. All employers should have a wellness screening program. Resources outlining screening program best practices are posted on the [DCEO Restore Illinois guidelines website](#)
 - a. Employers should conduct in-person screening of employees upon entry into workplace to verify no presence of COVID-19 symptoms
 - b. If employee shift is greater than 5 hours, employers should also conduct mid-shift screening to verify no presence of COVID-19 symptoms (in person preferred, though virtually is permitted)
3. If employee reports having any COVID-19 related symptoms, they should remain isolated at home for a minimum of 10 days after symptom onset OR until feverless and feeling well (without fever-reducing medication) for at least 72 hours OR confirmed to not have COVID-19 via 2 negative COVID-19 tests in a row, with testing done at least 24 hours apart
4. If employee reports having any COVID-19 related symptoms, employers should encourage employee to contact their health care provider; if multiple employees report having any COVID-19 related symptoms or test positive for COVID-19, employers should notify their local health department within one day of being informed of the prevalence of COVID-19 symptoms or positive test results
5. If an employee is identified as being COVID-19 positive by testing, CDC cleaning and disinfecting should be performed [according to CDC guidelines](#)
6. Where appropriate, notify employees who have been exposed. Employers should not identify an employee who tested positive by name
7. Any employee who has had close contact¹ with co-worker or any other person who is diagnosed with COVID-19 should quarantine for 14 days after the last/most recent contact with the infectious individual and should seek a COVID-19 test at a state or local government testing center, healthcare center or other testing locations. All other employees should be on alert for symptoms of fever, cough, or shortness of breath and taking temperature if symptoms develop

¹ Close contacts include household contacts, intimate contacts, or contacts within 6-ft. for 15 minutes or longer unless wearing N95 mask during period of contact.

Guidelines specific to Manufacturing businesses:

PHYSICAL WORKSPACE

i. Minimum guidelines

1. Manufacturers should [display signage](#) at entry with face covering requirements, social distancing guidelines, cleaning protocols, and any reduced capacity limit in multiple languages as needed
2. Manufacturers should reconfigure workstations to allow for 6-ft. social distancing between employees OR install impermeable barriers between employee workstations
3. Vending machines may remain in use, but they should be sanitized after each use. Employers are encouraged to place disinfectant wipes and hand sanitizer next to the machine for employee use

ii. Encouraged best practices

1. Eliminate common touchpoints (e.g., remove shared items in commons areas, use touchless door pulls)
2. Modify traffic flow to minimize contact (one-way traffic, designated entrance and exit)
3. Minimize the use of shared work materials (e.g., tools, equipment) and if practical, eliminate rotations / keep employees on a single station each day
4. If practical, reduce the use of shared papers and encourage use of digital tools
5. Where building management practices allow, increase air turnover rates in occupied spaces and increase outside make-up air to the maximum extent practical

DISINFECTING/CLEANING PROCEDURES

i. Minimum guidelines

1. Cleaning and disinfecting of premises should be conducted in compliance with [CDC protocols](#) on a weekly basis
2. Clean and disinfect common areas (e.g., restrooms, cafeterias) and surfaces which are touched by multiple people (e.g., entry/exit doorknobs, stair railings) frequently; every 2 hours recommended for high-traffic areas
3. Manufacturers should provide hand washing or sanitization stations that are easily accessible from anywhere on the manufacturing floor and have a plan in place for ensuring all stations are adequately stocked at all times
4. Workstations should be disinfected between every shift and in between employee handoffs
5. If equipment is shared, equipment should be disinfected before use by another employee
6. Clean and sanitize reusable articles (e.g., gowns, gloves) before they can be used by another employee or alternatively use single-use articles and dispose after use
7. All required disinfecting, cleaning, or sanitizing activities to be conducted by employees should be within their normal workday or during otherwise compensated time

ii. Encouraged best practices

1. Provide each employee with disinfecting/ cleaning materials to be used at his/her workstation

STAFFING AND ATTENDANCE

i. Minimum guidelines

1. Manufacturers should design a plan to allow for social distancing within the workplace and if needed, designate employee(s) to monitor capacity limits and social distancing
2. Manufacturers should limit the occupancy of common areas/ break rooms to allow for social distancing of 6-ft. or greater by removing/decommissioning furniture or staggering break times; this guideline is not intended to diminish employees break time requirements

ii. Encouraged best practices

1. Stagger shift start and end times to minimize congregation of employees during changeovers
2. Minimize the number of in-person meetings
 - a. If an in-person meeting is necessary, limit to 50 people with social distancing

EXTERNAL INTERACTIONS

i. Minimum guidelines

1. Before allowing external supplier or visitor to enter, or while requiring them to wait in a designated area, manufacturers should ask whether external supplier or visitor is currently exhibiting COVID-19 symptoms
 - a. If practical, manufacturers should take external supplier or visitor temperature using thermometer (infrared / thermal cameras preferred, touchless thermometers permitted)
2. Manufacturers should keep a log of all external suppliers and any visitors who enter the premises
3. Suppliers and other visitors should wear face coverings over their nose and mouth when entering premises (exceptions can be made for people with medical conditions or disabilities that prevent them from safely wearing a face covering)

ii. Encouraged best practices

1. Limit contact between external suppliers/ visitors and employees
2. If practical, clean and sanitize any incoming shipments before they enter the facility
