

# FTC Robotics Team

## #19168 - TOTUS 1 TUUS

Hello! We are a new FTC robotics team based out of Darien, Illinois. During our first year, we won the highest-scoring rookie award and placed 17th out of the 160 robotics teams in Illinois. We overcame many challenges as a rookie team; we learned how to program in Java, design schematics with CAD, implement core design principles, as well as how to work effectively as a team. We learned many valuable lessons from the past season and we have the ambitious goal of qualifying for the world championship during the 2022-2023 season.

To achieve this, we have set a fundraising goal of \$11,572. This money will go towards essential tools that will allow us to iterate faster as well as work in a more streamlined manner.

By supporting our team, whether that be through a tax-deductible donation or professional knowledge, your company shows its dedication to supporting the next generation of engineers and problem solvers. In addition, due to FTC's substantial audience, thousands of people will see your company and its support for STEM education.
