• **Updated Guidance for Healthcare Providers on Increased Supply of Nirsevimab for RSV 1/5/24**
  CDC advises healthcare providers to return to recommendations put forward by CDC and the Advisory Committee on Immunization Practices (ACIP) on use of Nirsevimab in young children. Infants and children recommended to receive Nirsevimab should be immunized as quickly as possible. Healthcare providers should not reserve Nirsevimab doses for infants born later in the season when RSV circulation and risk for exposure to RSV may be lower.

• **CDC Webinar:  Nirsevimab Supply and Prioritization Updates**
  • Wednesday, November 8, 2023 from 7:00–8:00 pm CT
    “Nirsevimab Supply and Prioritization Updates”, part of the AAP Respiratory Virus Webinar Series. Hear from CDC representatives and other experts about the current shortage of Nirsevimab, what to anticipate in terms of supply for the 2023-2024 RSV season, and highlights from the recently released CDC Health Advisory. Pediatricians, family physicians, practice managers, pediatric support staff, and others are encouraged to join. Visit the [AAP Respiratory Season Webinar Series](https://www.aap.org/aapnews/2023/11-09/cdc-nirsevimab-supply-prioritization-webinar) page for a recording.
