THE ASURINT ADVANTAGE

Hiring is the lifeblood of every organization. We get that background checks are what separates you from hiring the best candidate for the job. Partnering with Asurint means you get comprehensive and compliant results, fast.

Our People

When you work with Asurint, you work with a collaborative team that has your best interest at heart. Our team puts a lot of pressure on itself to complete the most accurate and compliant searches possible. From the very beginning when you first contact Asurint, through each background screen and question, we're here for you and ready to help.

Our Process

As a client's journey moves from sales to onboarding through implementation and support, we keep asking questions. We start with a deep dive into a business to find pain points, determine future goals and identify areas where better, more concise searches can be implemented to improve the overall employee search process and the business.

Our Technology

We personally build the tools you use to ensure you're getting the whole picture. While others rely on traditional methods that slow down the process, Asurint uniquely utilizes the power of IQLogics to intelligently recommend the best background search for every candidate. When all is said and done, take advantage of our analytics engine, Asurint Insights, for real-time analysis of your programs.
