

NPDES Permitting New and Proposed Rules and Policies

October 21, 2021 at 10:00 a.m. EST

Ashley Ward
DSW

Learn about new and proposed rules, policies, in-process, and upcoming regulations that could impact your non-stormwater National Pollutant Discharge Elimination System (NPDES) permit. The NPDES requires a permit for all facilities discharging pollutants from a point source to a water of the state. Pollutants are broadly defined as any type of industrial, municipal, or agricultural wastewater. Examples of point sources are publicly owned treatment works, industrial facilities, and urban runoff.

Join Ohio EPA's Division of Surface Water on October 21 to meet and hear from our staff regarding new and proposed rules and policies regarding the NPDES and permitting requirements.
