

Stronger Safety Approach Equates to Shapiro & Duncan's Plummeting Experience Modification Rating

Rockville, MD – July 12, 2017 – [Shapiro & Duncan, Inc.](#) announces today that our Experience Modification Rate is at an all-time low, dropping from .78 to .70 in a four year span due to rigorous safety measures.

“At Shapiro & Duncan, safety is our 1st priority. We believe that prevention is the key to having a safe work environment. We strive for a 100% injury and accident free workplace by reinforcing the strongest safety and control approaches”, said Safety Director, Roberto Morejon.

Written procedures, program reviews, site inspections and trainings developed by the Shapiro & Duncan Safety Committee are key elements to promote a safe work environment. As part of the continuous safety education program, ‘tool box talks’ are conducted weekly and emergency preparedness is covered monthly, at each job site. Over the years, our dedication to safety has been rewarded with our low Experience Modification Rate. Our EMR has exceeded the industry average by 16-29% since 2008 and is at its all-time low this year. Experience Modification Rate is graph shown below.

“Our uncompromising commitment to Quality has been a core value at Shapiro & Duncan from day one. Through apprenticeship training and education programs we develop industry leading craftsman, supervisory personnel and project management teams to ensure that our clients always receive the highest quality work product delivered in well supervised and safe environment by a professional staff.” – CEO, Sheldon Shapiro.

As an Accredited Quality Contractor, attention to detail and jobsite safety is mandatory. The company is committed to providing their employees with the skills they need to work safely and productively in order to meet the needs of their clients.
