SERVICE ON-THE-GO

JUNE 9, 2016

"Just a quick note to compliment your HVAC Technicians. We have a customer in a building where you guys maintain the central plant. We needed to drain a riser to make a piping repair. After A LOT of back and forth between our customer, the building engineer, the property manager, and your technician, we finally came to a resolution. Your technician agreed to meet us on site as "early as we needed him to be there." He came out at 6 a.m. The repair was made and all is well. Your tech was extremely helpful and pleasant to deal with the entire time. I must have called him a dozen times while going back and forth with everyone involved. He never once seemed bothered or annoyed which would have been understandable considering the circumstances and how busy we all are this time of year. Your technicians willingness to work with us to help us get our customer taken care of went beyond customer service. Being a business owner, I appreciate exceptional service when I see it. There two techs went above and beyond and I really appreciate it. It re-affirms my decision to refer enthusiastically refer you to anyone in need of your services."

- Michael S. Hartman, Thomas E. Clark, Inc.
