Representative Timothy Ramthun
Wisconsin State Assembly
409 North, State Capitol
P.O. Box 8953
Madison, WI 53708

RE: Decertification of Wisconsin Elector Votes

Dear Representative Ramthun:

I am writing to announce that the Amos Center for Justice & Liberty supports your call for the decertification of the 2020 Presidential Wisconsin Electors based upon the wide-spread election fraud and election law violations that occurred in the largest cities of the state and throughout Wisconsin.

The staff of the Amos Center for Justice & Liberty has conducted its own election investigation starting with the illegal Absentee Ballot Drop Boxes, over 500 of which were installed across Wisconsin before the 2020 Presidential Election. These drop boxes were paid for with grant money which counties obtained from the Center for Tech and Civic Life (CTCL). This private “non-profit” organization, in turn, received its money from Mark Zuckerberg and his wife to the tune of over \$350 million in September of 2020. That is a stunning figure given that prior to 2020, CTCL’s budget was no greater than \$100,000 in any given year. The organization was created in 2015 by an Obama Fellow.

A conspiracy to commit election fraud using these Absentee Ballot Drop Boxes and other violations of elections laws was allegedly initiated, in part, during the lame duck period of Barack Obama’s Presidency after President Trump had won the 2016 election but before he took office on January 20, 2017.

First, as President Obama was preparing to leave office, then Secretary of the Dept. of Homeland Security, Jeh Johnson laid the groundwork for a potential election steal by first creating the organizations by which the federal election guidelines, including those for absentee ballot drop boxes could be created. In fact, these early organizations, GCC and SCC were the precursors to what would become the Cyber Infrastructure Security Agency (CISA) in November of 2018. President Trump himself unknowingly signed the “instrument” by which his 2020 Presidential Election endeavor would be defeated, through both illegal and unconstitutional means. Once CISA was created, it absorbed GCC and SCC. The Absentee Ballot Drop Box guidelines were then created by these two organizations, now working inside of the CISA agency.

Second, Secretary Jeh Johnson “conscripted” several national, but private non-profit organizations. Under the pretense of a false national security threat, Secretary Johnson designated the National Association of Secretaries of State (NASS) and the National Association of State Legislators (NCSL) (among others) as new components of our country’s “critical infrastructure.” The members of NASS, to their credit, initially objected to being taken over by the federal government and put those objections in a Resolution.

This federal designation of “critical infrastructure” of these private organizations allowed for unprecedented federal access to their spheres of influence and their members. This new federal control of a private non-profit was then used to manipulate many state legislators, secretaries of state and other state election officials across the country. These unconstitutional actions by federal actors set the stage for one of the greatest election heists in the history of the world. See Article I, section 4 of the U.S. Constitution: “The times, places and manner of holding elections, for Senators and Representatives, shall be prescribed in each State by the legislature thereof, but the Congress may at any time by law make or alter such regulations, except as to the place of choosing Senators.”

ILLEGAL ABSENTEE BALLOT DROP BOXES

For the State of Wisconsin these events led to the Wisconsin Election Commission (WEC) obtaining a set of federal Absentee Ballot Drop Box guidelines which was then modified by WEC and was sent out in a memo

dated Aug. 19, 2020 by Megan Wolfe to the clerks in Wisconsin's 72 counties. This memo encouraged the counties to get grants in order to purchase the Absentee Ballot Drop Boxes which Megan Wolfe and her advisory staff knew was illegal under Wisconsin absentee voting statutes. The Wisconsin Election Commission's main purpose is to *guide* election officials as to what election laws *actually say*, not what election clerks or the members and employees of WEC want it to say. WEC staff knew that they didn't have legislative, or even rule-making authority based upon a WEC Statement made in May of 2020. Despite these facts, Megan Wolfe went ahead and *guided* and encouraged, through the Aug. 19, 2020 memo, the Wisconsin election officials to obtain and install over 500 absentee ballot boxes throughout the state, thereby intentionally violating election laws.

Nowhere in Wisconsin Election laws have Absentee Ballot Drop Boxes ever been legalized. Despite this truth, some Wisconsin legislators and other citizens have argued that there was neither a law that allowed the boxes or prohibited them. Therefore, these individuals argue it was okay to use them because of a variety of unpersuasive reasons: the USPS was unreliable, because clerks asked for them or because of the "vast" number of absentee voters in 2020. None of these excuses are acceptable reasons for violating Wisconsin's election laws. It is truly disheartening when legislators themselves are not interested in enforcing the very laws they pass. Why did they become law makers? If they don't know, understand and adhere to the laws of this state passed by current or past legislative bodies, then the legislators should resign at once.

Under **Wisconsin Statutes Chapter 6 The Electors, Subchapter IV "Voting Absentee"** it reads:

Wisconsin Statute 6.84 Construction. (1) LEGISLATIVE POLICY. The legislature finds that voting is a constitutional right, the vigorous exercise of which should be strongly encouraged. In contrast, voting by absentee ballot is a privilege exercised wholly outside the traditional safeguards of the polling place. The legislature finds that the privilege of voting by absentee ballot must be carefully regulated to prevent the potential for fraud or abuse; to prevent overzealous solicitation of absent electors who may prefer not to participate in an election; to prevent undue influence on an absent elector to vote for or against a candidate or to cast a particular vote in a referendum; or other similar abuses. (2) INTERPRETATION. Notwithstanding s. 5.01 (1) with respect to matters relating to the absentee ballot process, ss. 6.86, 6.87 (3) to (7) and 9.01 (1)(b), 2 and 4, shall be construed as mandatory. Ballots cast in contravention of the procedures specified in those provisions may not be counted. Ballots counted in contravention of the procedures specified in those provisions may not be included in the certified result of any election.

The statute above means that ballots cast or delivered in anyway not *expressly* permitted under Wisconsin Absentee Statutes cannot be counted in the certified result that is used to decide Electoral Votes.

Prior Wisconsin legislative bodies understood that unattended Absentee Ballot Drop Boxes would increase the likelihood and opportunity for massive absentee voter fraud. Under their carefully drafted language in the enacted LEGISLATIVE POLICY above, the legislators made it clear that they wanted tighter restrictions on absentee balloting, in part, to reduce the "potential for fraud or abuse." Furthermore, the law under INTERPRETATION is extremely clear: If you do not follow the processes and procedures laid out in the statutes, then the ballots cast by non-legal means, such as placing ballots into illegal Absentee Ballot Drop Boxes, cannot *be counted*. Yet, despite this clear mandate, tens of thousands of illegal ballots that were placed in these illegal boxes *were counted* in the 2020 Presidential Election.

But the last sentence of the statute above is critically important to the issue at hand when it states that such illegally counted Absentee Ballots *may not be included in the certified result of any election*. **Therefore, as a Wisconsin matter of law, the electoral votes MUST be rescinded as an operation of law: the drop boxes were illegal and therefore the ballots placed in them could NOT be counted or be used to determine which set of Wisconsin electoral votes were submitted to Congress.**

CRIMINAL CONSPIRACY

Whether the absentee ballot drop boxes were legal or illegal under Wisconsin law was the main question raised in Mueller v. Jacobs, an original action filed last year by the Amos Center for Justice & Liberty with the Wisconsin Supreme Court on Nov. 27, 2020. The case along with the Exhibits referenced in this letter can be found at www.amoscenterforjustice.org. While the Court in a 4-3 decision declined to hear the case for unstated reasons, the merits of the case were never litigated and decided. In fact, the DNC intervened in the case through their attorneys from Perkins Coie Law Firm. In their response to petitioner's filing, they produced evidence in the form of a letter from their attorney to Dane County Clerk that the Speaker of the Assembly Robin Vos and then President of the Senate Scott Fitzgerald approved of WEC's August 19, 2020 guidelines in order to decrease the likelihood that the boxes would be found to be illegal by the Wisconsin Supreme Court. But these two men, even

though they knew these Absentee Ballot Drop Boxes were illegal under Wisconsin election law statutes agreed with WEC that they were acceptable. See the Vos and Fitzgerald letter at www.amoscenterforjustice.org. This was done despite the fact that neither Robin Vos nor Scott Fitzgerald had the authority to declare these boxes legal outside of our state's constitutional legislative process; therefore, the ballot drop boxes remain illegal, along with the ballots that were placed within them. Furthermore, these two men each had the ability to call a special session in order to legalize these boxes before the 2020 Elections and yet they did not do so. The Citizens of Wisconsin have a right to know why they willingly and knowingly broken Wisconsin Election Laws. The Citizens of Wisconsin should also demand to know why a republican authored bill is still active that now seeks to legalize these drop boxes. Call your legislators and demand answers and demand that they do not move this bill forward.

These illegally installed and unattended and unmonitored Absentee Ballot Drop Boxes along with other alleged acts of Wisconsin Election Law violations by WEC staff and commission members such as expanding the language and changing the meaning of the *indefinitely confined* statute to include an extra 200,000+ voters who then did not have to show a legal identification to a poll worker, created a *perfect storm* in which a criminal enterprise came together and acted in concert for the purpose of stealing the 2020 Presidential Election in Wisconsin.

The election fraud that took place in Wisconsin also occurred in many other states with minor variations; however, the focus remained on targeting the other "battleground" states such as Georgia, Michigan and Pennsylvania by getting the Absentee Ballot Drop Boxes installed throughout those states. The nationwide campaign to use thousands of Absentee Ballot Drop Boxes across the whole country was facilitated and coordinated by actors within the federal government's CISA and the two private non-profits, NCSL and NASS, which worked closely with CISA's staff to create the messaging and to push the information out to the states.

Megan Wolfe received the federal Absentee Ballot Drop Box Model Guidelines from a yet unknown individual. She then revised them and sent out her own new version which was made from those federal model guidelines. The result was the August 19, 2021, memo which she sent out to Wisconsin election clerks.

At that same time as these events were occurring, Speaker of the Assembly Robin Vos was President of NCSL. It is important to note that Ms. Wolfe's newly created guidelines for the Wisconsin clerks violated Wisconsin State Election laws because there was no provision for drop boxes in the statutes. Ms. Wolfe also left out the most important clause from the federal model guidelines regarding election night ballot safety and integrity. This clause directed the reader as to the strong need to collect the ballots promptly at 8 p.m. and the importance of having a bipartisan, two-person team for each collection route. These election integrity statements from the federal model guidelines of the Absentee Ballot Drop Box document were omitted from the newly created Wisconsin version which was sent out to the election officials throughout Wisconsin on Aug. 19, 2020.

These same federal model guidelines were also used by New Mexico's Chief election official, Secretary of State Olivier, in the creation of New Mexico's version of the election guidelines for drop boxes. Secretary of State Olivier was coincidentally President of NASS, while Robin Vos was President of NCSL. In the case of these two private non-profit organizations, their respective websites' pages revealed a concerted and coordinated plan to bring the election messaging regarding "disinformation" and "misinformation" (which were created by the Federal CISA agency) into their own organizations. These organizations then created and coordinated the messaging as they pushed it out to their members' states' election officials.

It is important and necessary to recognize that Exhibit 9, which is a NASS document labelled "#Trustedinfo2020" in the Mueller v Jacobs (WEC) lawsuit which can be found behind the complaint filing at www.amoscenterforjustice.org is actually taken from a CISA messaging campaign document (See Exhibit 10) and proves through NASS's list of "partners" that extensive relationships were formed and fostered between different federal agencies such as the Department of Homeland Security, CISA and US Election Assistance Commission (EAC) and many other private non-profit *quasi-governmental* agencies such as NCSL, NASS, NAAG, and NASED, along with strictly private non-profit organizations such as the Center for Technology and Civic Life (CTCL), the National Vote at Home Institute (NVHI), Google, Facebook, Twitter, Center for Democracy & Technology (CDT) and Center for Election Innovation & Research (CEIR). At the bottom of Exhibit 9 it also states that "Promotional materials and other in-kind donations to support #Trustedinfo2020 messaging were provided by Ballot Trax, Civix, CyberDefense, Dominion Voting Systems, Election Systems & Software, Hart InterCivic, Notarize and Runbeck Election Services."

It is critical to understanding the scope and size of this criminal election fraud enterprise that individuals were aware that the elected officials in the "5" Wisconsin Cities of Madison, Milwaukee, Racine, Kenosha and Green Bay formed a contractual alliance that is allegedly criminal when they accepted money from CTCL for their individual cities and ended fair and transparent elections which all of the citizens of Wisconsin have a constitutional right to expect. *The alleged illegal Agreement was involved over \$8 million for the five cities in exchange for handing over access and control of each cities' elections processes and databases to the National Vote at Home Institute (NVHI)*. This private non-profit, which had already been mentioned in the paragraph above as one of

NASS's and NCSL's "partners" was run by Michael Spitzer Rubenstein. He was instrumental in running the election procedures and processes in at least Green Bay and Milwaukee as he determined and saw fit and was opposed to what Wisconsin Election Law Statutes required. The money given to the "5" cities was originally Mark Zuckerberg's which he allegedly laundered through the non-profit organization, CTCL (also previously mentioned above). These "5" cities' election procedures, processes and databases were "sold" or "rented" for over \$8 million in order to further this criminal enterprise's unlawful purpose of fraudulently stealing the 2020 Presidential Election electoral votes of Wisconsin.

The alleged misconduct in office of these five mayors should "shock the conscience" of every Wisconsin citizen. The misconduct and fraud have been apparent and in plain view for a year now. The misconduct was perpetrated upon the people of Wisconsin by elected officials and employees of city and state agencies who intentionally failed to perform their election duties and instead gave those duties to outsiders by entering an illegal contract with private actors.

Any public officer or public employee who does any of the following is guilty of a Class I felony: (1) Intentionally fails or **refuses to perform a known mandatory, nondiscretionary, ministerial duty** of the officer's or employee's office or employment within the time or in the manner required by law" (2) In the officer's or employee's capacity as such officer or employee, does an act which the officer or employee **knows is in excess of the officer's or employee's lawful authority** or which the officer or employee knows the officer or employee is forbidden by law to do in the officer's or employee's official capacity; or (3) Whether by act of commission or omission, in the officer's or employee's capacity as such officer or employee **exercises a discretionary power in a manner inconsistent with the duties of the officer's or employee's office or employment or the rights of others and with intent to obtain a dishonest advantage for the officer or employee or another.**

Wis. Stat. 946.12(1)(2)&(3);

No Election official may: In the course of the person's official duties or on account of the person's official position, intentionally violate or intentionally cause any other person to violate any provision of Chs. 5 to 12 for which no other penalty is expressly prescribed.

Wis. Stat. 12.13 (2)(b)(7)

Conclusion: It appears quite likely that these statutes were violated by various people.

FRAUD

Fraud always involves deception. Therefore fraud "vitiates" everything. Contracts where there is fraudulent inducement from the beginning are "null and void." Fraud nullifies contracts or judgments because if people knew the truth, they would have made different decisions. Fraud means that people are not going to receive what they thought they "bargained" for under a contract. Fraud almost always also involves criminals who attempt to cover-up their illegal activities and wrongful acts through deceit, by conspiring with others in power to suppress the TRUTH and hide their criminal acts from the people that they serve. U.S. v. Throckmorton, 98 U.S. 61, 25 L.Ed.93 (1878) (quoting "where the unsuccessful party has been prevented from exhibiting fully his case, by fraud or deception practiced on him by his opponent, as by keeping him away from court, a false promise of a compromise; or where the defendant never had knowledge of the suit, being kept in ignorance by the acts of the plaintiff; or where an attorney fraudulently or without authority assumes to represent a party and connives at his defeat; or where the attorney regularly employed correctly sells out his client's interest to the other side...). So too as in the case cited in this past election, the allegations of fraud and illegalities were never given a fair and impartial "hearing" because the media and censors prevented such information from getting out. Those that saw election wrongdoing were also silenced by the media through propaganda. People in power from both political parties used deception, lies and sleight of hand to give the appearance that all the matters had already been thoroughly investigated, when they had not. Deception and lies covered up much wrongdoing and no official law enforcement agency until Racine County Sheriff was willing to investigate the allegations.

The Throckmorton case envisions just such a scenario as what is now before us. In addition, to the initial fraud and illegalities, many people in this election fraud conspiracy have worked very hard over the past year to suppress the truth. In these circumstances, the wisdom of the Throckmorton decision should apply and **"these, and similar cases which a new suit may be sustained to set aside and annul the former judgment or decree and open the case for a new and a fair hearing"** should apply. Id.

The scenario described above is exactly what transpired in the weeks leading up to the wrongful “certification” of the ten electors from Wisconsin. People in positions of power at the local, state and federal level prevented the TRUTH of the election fraud and illegalities from being openly heard and evaluated. Every legislator has a duty to uphold the U.S. Constitution and to ensure that all state election laws are followed and that voters in Wisconsin can be assured that they have transparent and fair elections for the highest offices in the land. Their job is not to dismiss allegations of fraud and then help cover-up alleged criminal activity by demeaning the intelligence of their constituents.

The State of Wisconsin’s Assembly and Senate members have been charged since statehood in 1848 through the federal constitution, Article I, section 4, with determining and enacting the statutory balloting processes to be used in the election of all U.S. Congressman. In the past, our members of the legislature have done an excellent job of writing strong election laws that were intended to prevent cheating and election fraud, especially through absentee ballots as I have already discussed. These laws are still the law. They are not suggestions.

Multiple election laws have allegedly been violated by the Wisconsin Election Commission members and staff. Other elected officials throughout Wisconsin have also allegedly committed acts or omissions that amount to election law violations and ensuing cover-ups. The mayors of five Wisconsin cities allegedly conspired and worked together in concert with other city employees, staff members and outsiders from private organizations and individuals, including some attorneys who took an oath to uphold the U.S. Constitution and the Wisconsin State Constitution. This alleged conspiracy was orchestrated in order to steal a presidential election for the purpose of destroying free elections, stealing sovereignty from “We the People,” removing Trump from office and to unleash tyranny upon the Citizens of the United State of America.

Conclusion: Even though there can be fraudulent activities throughout many areas of the law, the consistent remedy for fraud or deceit is nullification. In the case at hand, the legislature has a duty to rescind electoral votes cast using illegal processes and fraudulent means with which to obtain and count ballots that the law clearly says can’t be counted. It should do so at once.

CONSEQUENCES and CONCLUSION

The result of this stolen election has been the replacement of our freedom loving constitutional republic with a growing totalitarian system that tramples upon the rights of the people through medical tyranny and brute force. Peoples’ fundamental rights to speak out, to go to school, go to work, to run a business, to reject vaccines for themselves and their children if they choose and even to seek medical treatments for their loved ones. These rights have all been abridged through illegal and unconstitutional mandates as a *result of a statewide and nationwide stolen election*.

By now the Attorney General of the State of Wisconsin, Josh Kaul, should have completed a thorough investigation into the many allegations of wrongdoings which transpired during this past presidential election. But “We the People” in the State of Wisconsin had no independent investigation out of the attorney general’s office which is supposed to be neutral in order to carry out its duties in a non-partisan way to ensure that “justice is blind” and that every person is “equal under the law.” So “We the People of Wisconsin” who employ the Attorney General (who coincidentally worked for the Perkins Coie Law Firm prior to becoming Attorney General of Wisconsin) were kept away from the courts of law.

For these reasons we are calling for the immediate resignation of Attorney General Josh Kaul. We are also calling for the independent appointment of a special prosecutor. We invite district attorneys and Sheriff’s Departments in every Wisconsin county to join in the quest for justice along with Amos Center for Justice & Liberty’s year long *civil* RICO investigation (Racketeering, Influence, Corrupt Organizations) by opening their own independent *criminal* investigations into these matters so as to coordinate with a special prosecutor in a state-wide probe of the many alleged actors in the November 2020 Presidential Election and the April 2020 Wisconsin Supreme Court race and those who helped cover it up any wrongdoing.

Finally, it is critical that “Wisconsin, Stands Up for Freedom” now! People of this state must support your efforts to decertify the ten electoral votes cast in this fraudulent presidential election. Recently State Senator Bernier stated: “but there is no evidence of intentional malfeasance, no evidence that the election in 2020 wasn’t accurate.” She made that statement after enlisting the aid of Dan Becker, the director of the Center for Election Innovation & Research (CEIR), one of the groups that the NASS website listed as a “partner” along with CISA.

It is the duty of each legislator to declare each electoral vote cast by Wisconsin Electoral Voters to be “null and void” due to fraud; to be declared “illegal” as a matter of law under Wisconsin Statute 6.84 (2) and to vote to decertify the electoral ballots as soon as possible. “We the People” must call their state senators and assembly members today and let them know that they will work to recall their respective legislators if they will not STAND AGAINST election fraud and illegalities. Thank you for standing up for Freedom and Election Integrity. May God Bless America, once again, for our grandchildren’s sake!

Best regards, *Karen L. Mueller, General Counsel*
