

# Climate Change Debate:

## *Control the Money; Control the Story*

Our guest speaker, Dr. Joe Magner, is Professor of Environmental Hydrology in the Department of Bioproducts and Biosystems Engineering, University of Minnesota, St. Paul, MN. Dr. Magner hopes to promote healthy reasoning by demonstrating how the function of clouds is the defining factor influencing climate more than CO<sub>2</sub>. He also proves past ice ages and interglacial periods were much colder and warmer than today's climate when highlighting a larger time scale. What does this mean?

Billions of dollars pumped into climate change research. Why did the Federal Government get involved? Is there an agenda? Who started modern climate change? More importantly, who hijacked it along with the earth/environmental movement? Today more than 31,000 scientists request an end to Climate Scare based on many inconvenient facts.

Come find out more & join us for healthy discussion with Dr. Joe Magner.

**Date:** August 16<sup>th</sup>, 2018

**Time:** 6:30 pm

**Location:** **Kilkarney Hills Golf Course**  
**163 Radio Road**  
**River Falls, WI 54022**

*Sponsored by: Wisconsin Constitutional Prayer & Action Group*
