

Data Cyber School

School #1021

LISTED AT

\$299,000

 **Georgia & Ohio**

ABOUT THE SCHOOL

This school startup is well-positioned to be a professional services firm supporting federal, state, and local governments, private for-profit and nonprofit clients. The curriculum is designed to equip students with certified IT job skills that are in high demand today, while meeting challenges facing industries, regardless of the markets they service. This school will train adults from career changers to college graduates in less time and cost than traditional learning. Skills will be developed considering the student's personal life demands without compromising the needs of the industries they will serve.
