## **Hunterdon Continues Local Economic Support With Sixth Municipal Economic Development Grant**

Continuing Hunterdon County's effort to ensure the area's economic recovery is strong as the region emerges from the state's COVID-19 shutdown, the County Freeholder Board approved a municipal economic development grant for East Amwell Township to support the revitalization of the Ringoes Village, the sixth such grant award to Hunterdon municipalities in 2020.

"The grant for East Amwell is another major step taken this year in a series of moves by the Freeholder Board designed to help make Hunterdon competitive and investable, as the economy recovers," Freeholder Matt Holt, the Board Economic Development liaison stated.

This most recent grant of \$18,000 to East Amwell is to assist efforts to revitalize Ringoes and encourage economic development in the township. As per the County's grant program guidelines, the town is responsible for 10% of the overall project cost of \$20,000, so will be putting \$2,000 towards the effort.

The Ringoes Village Advisory Committee, created to guide the village's revitalization efforts, has found that the Ringoes Village Study, created in 2014, requires updating in order to support the township's current economic development vision. Along with this, the Township will also review its associated planning and zoning along the 31/202 corridor

"These changes should help the township revitalize Ringoes, contribute to the local economy, and set the stage for other planned economic development efforts to follow," Holt explained.

Other municipalities receiving economic development grants this year include Lambertville, Milford, Frenchtown, Franklin Township, and Kingwood Township.

"The goal of these county funded projects is to help make the towns are more attractive for investment while maintaining the character of the community," Holt added.

According to Economic Development Director Marc Saluk, "Projects spurred from grants issued in 2019 are also wrapping up this year. Examples include the Borough of High Bridge, which enhanced its municipal website, and Raritan Township, which utilized grant funding for a planning and zoning review that is currently underway."

The grant program is funded annually with grants being issued on a rolling basis to Hunterdon municipalities looking to launch programs and initiatives that are consistent with the county's economic development objectives.

"In another move to provide a boost to the local business community, the Freeholders earlier this year approved local business non-profits, such as merchant associations and chambers of commerce, as

eligible recipients of the grant program, so that they are better able to provide services in response to the COVID-19 pandemic,” Saluk said.
