

NORC at the University of Chicago is working with the California Health Care Foundation (CHCF) to conduct **phone interviews with adults in California who have been diagnosed with both substance use and mental health conditions.**

The purpose of this project is to understand the health care system experiences of people who have faced with substance use and mental health conditions.

We estimate that the phone interview will take about 40 minutes.

To show our appreciation, we will **offer you a \$50 gift card** for your participation in this study.

During the phone call, we will ask you questions about your experiences trying to find and then participate in treatment for problematic substance use and mental health issues. There are no wrong answers- we are just interested in better understanding your experiences. Your name or any other information that could identify you will **not** be shared with the California Health Care Foundation or publicly.

If you are interested in participating in this interview, please email [CAInterviews@norc.org](mailto:CAInterviews@norc.org) or call us at **312-758-3492** and we will work with you to set up a time for this phone interview that works best with your schedule.

Thank you for your consideration!
