

September 14, 2020

Greetings,

The Minnesota Department of Transportation is partnering with the city of Marshall to test a safety project along Hwy 19/College Dr. for people who walk and bike.

The project being temporarily installed is a median island refuge at Hwy 19/College Dr. and High Street (near the school). An example of the project is pictured below. A median refuge island allows people who walk and bike the ability to cross only one lane of traffic at a time, which shortens the distance for crossing and provides a refuge.

(pictured above – temporary median refuge island)

The project will be installed the week of Sept. 14th and will be in place for approximately 30 days. During the 30 days we ask that you take some time to try out the project and provide us with your comments. After 30 days, the projects will be removed.

To give us your feedback on this project, a short survey is available at <http://www.dot.state.mn.us/d8/projects/hwy19marshall/index.html> or you can complete the survey (on the back of this letter) and send to MnDOT District 8 or drop off at Marshall City Hall (temporary location) at 1501 State St. SS 141 (SMSU). Paper surveys are also available at Marshall City Hall (temporary location). Thank you in advance for your feedback about the potential safety enhancement.

If you have any questions about the project, please visit the project website or contact Lindsey Bruer, Planning Director.
