

## Have You Ever Considered Being Part of a Clinical Study?

**Medical Research Needs to include *ALL patient groups* to develop treatments that work for everyone!**

**Participating in a medical study might help you NOW and others in the FUTURE.**

### **WHAT YOU GIVE:**

- Your time for appointments and testing
- Your commitment to do your best to complete the study
- Your permission to participate in medical treatment (exams, lab studies, medication)

### **WHAT YOU GET:**

- **FREE access to new treatments & medicines**
- **FREE medical monitoring**
- **Complete privacy**
- **Reimbursement for time/travel**
- **Education**
- **Clear explanations of possible benefits and side effects**
- **Experienced study doctors and staff who communicate with your doctors**

**All study related medical records are confidential and are only shared with your personal health provider or with your permission. No sharing of any personal information otherwise!**

---

**Visit our website or scan the QR code to learn about upcoming studies on weight loss medications, painful diabetic peripheral neuropathy, diabetes, hypothyroid replacement and more.**
