This material was prepared by VHQC, the Medicare Quality Innovation Network Quality Improvement Organization for Maryland and Virginia, under contract with the Centers for Medicare & Medicaid Services (CMS), an agency of the U.S. Department of Health and Human Services. The contents presented do not necessarily reflect CMS policy.  
VHQC/11SOW/8/31/2016/2567

Join VHQC and healthcare colleagues in Maryland and Virginia for the third webinar in our medication safety series focused oral anticoagulants. Our speaker, Kelechi (K.C.) Ogbonna, PharmD, CGP, will offer recommendations to both prescribers and pharmacists.

By participating in this live webinar, you will achieve the following learning objectives:

1. Compare and contrast the pharmacology, pharmacokinetics, and other attributes of direct oral anticoagulants (DOACs) to existing strategies for anticoagulation in atrial fibrillation and venous thromboembolism.
2. Identify patient characteristics and clinical scenarios that may dissuade the use of DOACs.
3. Design a comprehensive and appropriate treatment plan when presented with a patient requiring anticoagulation.
