

AT-HOME RESEARCH STUDY FOR HEALTHY CHILDREN AND TEENS AGED 12-17 YEARS OLD

**UCSF RESEARCHERS ARE STUDYING HOW
HEALTHY CHILDREN AND TEENS PAY ATTENTION**

We are recruiting participants!

Who can be in this study?

- Aged 12-17 years old
- No developmental, neurologic, or psychiatric disorders (for example: no dyslexia, autism, or mental health diagnoses)
- Normal or corrected-to-normal vision and hearing
- Fluent in English

In this study:

- Using a computer at home, **minor participants** will complete tasks of cognitive skills (like attention) and fill out short surveys about their everyday behaviors, mindsets, and beliefs
- A **parent/guardian** will also fill out brief surveys about their child
- The participant's participation will take approximately 1 hour

Participants will be compensated up to \$30
(via a mailed Amazon gift card)
