

# COVID-19 Test & Trace

New York City and Sunset Park have made strong progress over the past months, with relatively low percentages of daily positive tests (Citywide - 0.72% over the past month, Sunset Park between 0.48-0.7% during the same period).

Citywide vaccination rates include 67% of adults having received at least one dose of a vaccine and 64-80% of Sunset Park adults having received at least one dose. The Sunset Park percentages for positivity and vaccination rates vary between 11220 and 11232.

Variants of the COVID-19 virus have been identified in New York City tests over the past month and continue to be monitored. Variants are more likely to spread, cause reinfection among those who already have had COVID-19 and cause more severe illness in those who get sick.

CFLSP provides weekly updates to its directors and Sunset Park-area schools with information on local testing sites, vaccine data, and other relevant resources. Schools regularly forward this information via email or text to their parent networks.
