

Reminder!

Don't forget to book your webinar.

October is National Cybersecurity Awareness Month

Information Security Webinar for Your Team

As a financial institution, Tower Federal Credit Union takes cybersecurity very seriously. To celebrate National Cybersecurity Awareness Month, offer your employees an information security best practices webinar hosted by, Phil Mellinger, Tower's Vice President-Information Security.

Phil has 40 years of information technology and cybersecurity experience. His informative "How Did They Know About Me?" webinar can help you and your team better understand the ever present threats from cyber criminals. Phil's unique perspective and experience base allows him to provide insightful, practical information.

Phil will personally walk through the ways information is accessible to cyber criminals –

- Willingly giving information
- Unknowingly providing access
- Information taken from you
- Your information taken from others

He'll cover phishing, metadata, keyloggers, malware, data breaches, IoT and how best to protect yourself from these and other cyber threats.

Phil holds four information security patents and has 13 more pending. He has devised a method for testing the security of internet merchants and how to detect advanced fraud techniques. Phil also sits on the Cybersecurity Association of Maryland Inc.'s (CAMI) Advisory Council. Let his expertise pave the way for better cybersecurity awareness for you and your team!

Contact your Account Manager to schedule your webinar today!
