

LeBrasseur Engineering

1194 WALNUT STREET NEWTON, MA 02461
(617) 965-5955 lebrasseurengineering.com

Structural Engineer or Technician (minimum 3 years)

LeBrasseur Engineering in Newton, MA is a small engineering firm specializing in residential and small commercial structures. We are seeking a structural engineer or technician (minimum 2 years) who is dynamic, enthusiastic, self-motivated, and able to work with minimal supervision on a variety of design and inspection projects. Working remotely at times is a possibility. If this describes you, you could be our next teammate!

Experience or strong desire in wood-frame construction is a must. Work includes design and construction phase services for wood-frame and steel construction. Projects vary from small to high-end structures, including renovations, additions and new construction for residential and small commercial projects. Analysis, design and inspection services will be performed on a regular basis.

Required computer skills: AutoCAD, Excel, Basic structural programs.

Please reply to lebrasseur@aol.com with letter of interest and resume. Responses will be sent only to those meeting the specified requirements. Salary commensurate with experience.

Recruiters please do not contact this job poster.

Bridge Engineers not needed.

No relocation benefits. Must live in Boston area or willing to relocate to this area.
