The Solution:

A comprehensive coordinated approach to introduce and/or expand the knowledge of our youth about STEM or STEAM related subjects in such a way that they become excited and engaged about learning more about these subjects.

To bring awareness to the many different agencies and organizations that work through-out the year in these fields for our youth.

Bay Area Black Youth Tech-a-thon

A series of events that exposes nearly 1,000 African American youth from 1st grade thru 12rh grade and young adults (18-24) to the sciences and technology that will govern their future with regards to jobs or starting businesses.

Our youth must evolve beyond being users and consumers of technology into investible producers, problem solvers and innovators using these same technologies and sciences

Be a part of this year's BABYTech by becoming a sponsor, partner, volunteer, technical assistant or youth to compete for prizes, awards, possible scholarships and more.

Finals Saturday Feb 2nd, 2019

But must sign up now http://www.blackchamber.com/techathon/
