NEW PRODUCT:
580SV
CONSTRUCTION KING
ROCK-SOLID
GUARANTEED LEASE
NOT SATISFIED?
RETURN THE 580SV
AFTER 12 MONTHS
WITH NO FURTHER
OBLIGATIONS!

GREATER STABILITY AND MATERIAL RETENTION

The tool carrier loader design of the CASE 580SV improves stability, material retention and visibility down to the bucket.

SEE EVERYTHING

A large cab with tool carrier design and lots of glass leads to great visibility to all work areas.

BOOM OPTIONS FOR ALL

A curved boom aids in clearance over the side boards of dump trucks and an inner extension of the Extendahoe means less weight extending out for better performance and a simple design for easier maintenance. The 580SV is also available with an over-lapping cylinder boom that has the outer housing that extends out.

INTELLIGENCE COMES STANDARD

Each CASE 580SV Construction King comes standard with a CASE SiteWatch telematics subscription, improving fleet management practices, improving uptime, and serving as a platform that helps both equipment owners and CASE dealers be more proactive in supporting each machine.
