These sessions are fun and fast-paced, a way for students to begin working with Mary Weaver for the 2026 production season. Improvising, dramatic action, character creation, and developing a sense of humor are all part of the sessions.

Acting is a creative way to learn about yourself and experience how it feels to be another character. The Playhouse offers students the chance to think for themselves while getting help as needed. Programs are developed for each individual in a supportive and non-threatening way.
