

FALL IS THE BEST TIME TO PLANT

Here's what Carol had to say about this time of year:

"It's time for my annual reminder. If you've been following me for long you know that this is my mantra."

Plant sex is done for the year, the heat of summer is passing, rains come and soil moisture stays more stable, the sun is still high enough in the sky to keep plants happily fed, but not as scorching as in summer. All this adds up to less transplant shock and plenty of time for roots to get established."

**411 Nickerson Road
Swanville, Maine**
