THE PAR GROUP

Under a single comprehensive agreement, Par will conduct required inspections, perform required tests, and file all necessary compliance paperwork for all covered local laws. These inspections are conducted by certified and operator-qualified technicians in strict accordance with the requirements of each Local Law. Service levels are available to suit your needs; from single inspections to comprehensive 5-year plans for entire portfolios.

The Advantages of Our Comprehensive Program Include:

- Significant cost and time savings over one-time inspections
- Single-source responsibility for inspection, testing and filing for up to a 5-year cycle for covered mandatory inspection and testing services
- Automatic tracking and scheduling of inspections and testing services during the covered period
- Regular updates on changes to covered laws and compliance requirements
- Regular updates on technologies that enhance the safety and security of your water and gas systems

Bundle Testing & Inspection Services

- Fire protection system inspection, testing and repairs (NFPA25)
- Gas system inspection and repairs (LL152)
- Primary (DEP registered) and secondary (DOB registered) backflow testing, repairs, replacement and installation

All 3 of the above services must be included in a new multi-year contract. One contract per address.
