

CURRENT COVID-19 CLEANING PROTOCOLS

On a daily basis, Metro's Security Team uses the electrostatic sprayer Monday through Friday on hot spots including, but not limited to handrails, door knobs, doors, etc. throughout the entire school and Administrative Office areas.

Each Sunday, the Security Team uses the electrostatic sprayer with an approved COVID-19 cleaner in the entire building (except offices with security locks). Additionally, Metro's Maintenance Team cleans the handrails, door knobs, doors, entry points, etc. on a daily basis with an approved COVID-19 cleaner.

During the end-of-year activities and locker clean-out (May 18 - 22), both the Maintenance and Security Teams have increased the frequency of their COVID-19 cleanings.

Beginning Monday, June 1, 2020 with the start of Camp Patriot:

The Security Team will spray the Middle School Camp Patriot hot-spots, including, but not limited to the basement stairwell, hallways, door knobs, doors, and lunch tables at 9:00AM (after campers have begun the morning session), 1:00PM (after campers have begun the afternoon session), and at the end of the camp day.

Our current plan is for separate classrooms to be used for the morning sessions versus the afternoon sessions to allow for a thorough cleaning and disinfecting each day. If that is not possible for some reason, a contingency plan will be activated and the Maintenance Team will coordinate with the Security Team for a thorough cleaning and disinfecting of any room that will be re-used in the afternoon.
